

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 22, Numbers 7-8

July/August 2017

Pavol Quittner , Threshold and strong threshold solutions of a semilinear parabolic equation	433
Mesognon-Gireau Benoit , The Cauchy problem on large time for a Boussinesq-Peregrine equation with large topography variations	457
Michael Ruzhansky and Durvudkhan Suragan , Local Hardy and Rellich inequalities for sums of squares of vector fields	505
Roland Schnaubelt , Stable and unstable manifolds for quasilinear parabolic problems with fully nonlinear dynamical boundary conditions	541
