

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 26, Numbers 1-2

January/February 2021

Xiaoming Wang and Hao Wu , Global weak solutions to the Navier–Stokes–Darcy–Boussinesq system for thermal convection in coupled free and porous media flows	1
Yanan Li and Zhijian Yang , Strong attractors and their continuity for the semilinear wave equations with fractional damping	45
Zhihong Chen and Dongsheng Li , Existence and $W^{1,p}$ estimates of certain Maxwell type equations in Reifenberg domains	83
