

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 17, Numbers 1-2

January/February 2012

Marina Ghisi , Hyperbolic-parabolic singular perturbation for mildly degenerate Kirchhoff equations with weak dissipation	1
Giuseppe Maria Coclite and Kenneth Hvistendahl Karlsen , On an initial-boundary value problem for the hyperelastic rod wave equation ..	37
M.L. Oliveira, M.R. Clark, and A.O. Marinho , On a nonlinear generalized thermoelastic system with obstacle	75
Mohammad A. Rammaha and Zahava Wilstein , Hadamard well-posedness for wave equations with p-Laplacian damping and supercritical sources .	105
Andrea Fugazzola , Reverse Hölder inequalities and higher integrability for subcritical parabolic equations	151
Leonardo Kosloff and Tomas Schonbek , On the Laplacian and fractional Laplacian in an exterior domain	173
