

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 23, Numbers 5-6

May/June 2018

Maria Michaela Porzio, Regularity and time behavior of the solutions of linear and quasilinear parabolic equations	329
Takiko Sasaki, Regularity and singularity of the blow-up curve for a wave equation with a derivative nonlinearity	373
Fatih Ozbag, Stephen Schecter, and Grigori Chapiro, Traveling waves in a simplified gas-solid combustion model in porous media	409
Ambrosio Vincenzo, Mountain pass solutions for the fractional Berestycki-Lions problem	455
