ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 26, Numbers 9-10 **September/October 2021**

Marco Gallo, Multiplicity and concentration results for local and fractional NLS equations with critical growth 397

Siyu Chen, Carlos Alberto Santos, Minbo Yang and Jiazheng Zhou, Global multiplicity of solutions for a quasilinear elliptic equation with concave and convex nonlinearities 425

Wojciech Kryszewski and Jakub Siemianowski, Constrained semilinear elliptic systems on $\mathbb{R}^N$ 459

David Arcoya, Lucio Boccardo, and Luigi Orsina, Schrödinger-Maxwell systems with interplay between coefficients and data 505
