

ADVANCES IN DIFFERENTIAL EQUATIONS

Volume 28, Numbers 5-6

May/June 2023

Gustavo S.A. Costa, Giovany M. Figueiredo, and José Carlos O. Junior, Existence of positive solution for a class of elliptic problems with indefinite nonlinearities with critical and supercritical growth	347
Gung-Min Gie, James P. Kelliher, and Anna L. Mazzucato, The linearized 3d Euler equations with inflow, outflow	373
Andrei V. Faminskii, The higher order nonlinear Schrödinger equation with quadratic nonlinearity on the real axis	413
Jinxia Cen, Seong Jin Kim, Yun-Ho Kim, and Shengda Zeng, Multiplicity results of solutions to the double phase anisotropic variational problems involving variable exponent	467
Fágner D. Araruna, E. Fernández-Cara, and Luciano C. da Silva, Hierarchical exact controllability of hyperbolic equations and Dunford-Pettis' theorem	505
