

# ANNALES DE L'INSTITUT HENRI POINCARÉ

## PROBABILITÉS ET STATISTIQUES

<b>Path-space moderate deviations for a Curie–Weiss model of self-organized criticality</b> <i>F. Collet, M. Gorny and R. C. Kraaij</i>	765–781
<b>Divergence of shape fluctuation for general distributions in first-passage percolation</b> ..... <i>S. Nakajima</i>	782–791
<b>Parabolic Anderson model with a fractional Gaussian noise that is rough in time</b> ..... <i>X. Chen</i>	792–825
<b>Stable matchings in high dimensions via the Poisson-weighted infinite tree</b> . . . <i>A. E. Holroyd, J. B. Martin and Y. Peres</i>	826–846
<b>Infinite rate symbiotic branching on the real line: The tired frogs model</b> ..... <i>A. Klenke and L. Mytnik</i>	847–883
<b>A perturbation analysis of stochastic matrix Riccati diffusions</b> ..... <i>A. N. Bishop, P. Del Moral and A. Niclas</i>	884–916
<b>Indistinguishability of collections of trees in the uniform spanning forest</b> ..... <i>T. Hutchcroft</i>	917–927
<b>Sanov-type large deviations in Schatten classes</b> ..... <i>Z. Kabluchko, J. Prochno and C. Thäle</i>	928–953
<b>A Central Limit Theorem for Wasserstein type distances between two distinct univariate distributions</b> <i>P. Berthet, J.-C. Fort and T. Klein</i>	954–982
<b>On the mixing time of the Diaconis–Gangolli random walk on contingency tables over <math>\mathbb{Z}/q\mathbb{Z}</math></b> <i>E. Nestoridi and O. Nguyen</i>	983–1001
<b>Weak uniqueness and density estimates for SDEs with coefficients depending on some path-functionals</b> <i>N. Frikba and L. Li</i>	1002–1040
<b>On a toy network of neurons interacting through their dendrites</b> ..... <i>N. Fournier, E. Tanré and R. Veltz</i>	1041–1071
<b>Asymptotics of free fermions in a quadratic well at finite temperature and the Moshe–Neuberger–Shapiro random matrix model</b> ..... <i>K. Liechty and D. Wang</i>	1072–1098
<b>Non-equilibrium fluctuations for the SSEP with a slow bond</b> <i>D. Erhard, T. Franco, P. Gonçalves, A. Neumann and M. Tavares</i>	1099–1128
<b>Infinite geodesics in hyperbolic random triangulations</b> ..... <i>T. Budzinski</i>	1129–1161
<b>On the performance of the Euler–Maruyama scheme for SDEs with discontinuous drift coefficient</b> <i>T. Müller-Gronbach and L. Yaroslavtseva</i>	1162–1178
<b>Absence of percolation for Poisson outdegree-one graphs</b> ..... <i>D. Coupier, D. Dereudre and S. Le Stum</i>	1179–1202
<b>Trees within trees II: Nested fragmentations</b> ..... <i>J.-J. Duchamps</i>	1203–1229
<b>Stochastic Hölder continuity of random fields governed by a system of stochastic PDEs</b> . . <i>K. Du, J. Liu and F. Zhang</i>	1230–1250
<b>Hua–Pickrell diffusions and Feller processes on the boundary of the graph of spectra</b> ..... <i>T. Assiotis</i>	1251–1283
<b>Outliers in the spectrum for products of independent random matrices</b> ..... <i>N. Coston, S. O’Rourke and P. M. Wood</i>	1284–1320
<b>Interacting self-avoiding polygons</b> ..... <i>V. Betz, H. Schäfer and L. Taggi</i>	1321–1335
<b>Lower bounds for fluctuations in first-passage percolation for general distributions</b> <i>M. Damron, J. Hanson, C. Houdré and C. Xu</i>	1336–1357
<b>The sharp phase transition for level set percolation of smooth planar Gaussian fields</b> <i>S. Muirhead and H. Vanneuville</i>	1358–1390
<b>Parameter recovery in two-component contamination mixtures: The <math>L^2</math> strategy</b> <i>S. Gadat, J. Kabn, C. Marteau and C. Maugis-Rabusseau</i>	1391–1418
<b>Size of a minimal cutset in supercritical first passage percolation</b> ..... <i>B. Dembin and M. Théret</i>	1419–1439
<b>Local densities for a class of degenerate diffusions</b> ..... <i>A. Lanconelli, S. Pagliarani and A. Pascucci</i>	1440–1464
<b>Exponential weights in multivariate regression and a low-rankness favoring prior</b> ..... <i>A. S. Dalalyan</i>	1465–1483
<b>Stein’s method for functions of multivariate normal random variables</b> ..... <i>R. E. Gaunt</i>	1484–1513
