

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

A lower bound for the principal eigenvalue of the Stokes operator in a random domain	<i>V. V. Yurinsky</i>	1–18
Loop-free Markov chains as determinantal point processes	<i>A. Borodin</i>	19–28
An asymptotic result for Brownian polymers	<i>T. Mountford and P. Tarrès</i>	29–46
Iterative feature selection in least square regression estimation	<i>P. Alquier</i>	47–88
A stochastic fixed point equation for weighted minima and maxima	<i>G. Alsmeyer and U. Rösler</i>	89–103
LAMN property for hidden processes: The case of integrated diffusions	<i>A. Gloter and E. Gobet</i>	104–128
Stabilité du comportement des marches aléatoires sur un groupe localement compact	<i>D. Grete</i>	129–142
Random walk on graphs with regular resistance and volume growth	<i>A. Telcs</i>	143–169
Invariance principles for random walks conditioned to stay positive	<i>F. Caravenna and L. Chaumont</i>	170–190
