

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

Path dependent Feynman–Kac formula for forward backward stochastic Volterra integral equations <i>H. Wang, J. Yong and J. Zhang</i>	603–638
Nonlinear predictable representation and \mathbb{L}^1-solutions of backward SDEs and second-order backward SDEs <i>Z. Ren, N. Touzi and J. Yang</i>	639–666
A central limit theorem for descents of a Mallows permutation and its inverse <i>J. He</i>	667–694
Topological expansion in isomorphism theorems between matrix-valued fields and random walks <i>T. Lupu</i>	695–721
Universality classes for general random matrix flows <i>J. Malecki and J.L. Pérez</i>	722–754
Hamilton–Jacobi equations for inference of matrix tensor products <i>H.-B. Chen and J. Xia</i>	755–793
Spectral gap and cutoff phenomenon for the Gibbs sampler of $\nabla\varphi$ interfaces with convex potential <i>P. Caputo, C. Labbé and H. Lacoïn</i>	794–826
Spectral analysis of the zigzag process <i>J. Bierkens and S.M. Verduyn Lunel</i>	827–860
Zero kinetic undercooling limit in the supercooled Stefan problem <i>G. Baker and M. Shkolnikov</i>	861–871
Geometric convergence bounds for Markov chains in Wasserstein distance based on generalized drift and contraction conditions <i>Q. Qin and J.P. Hobert</i>	872–889
A microscopic derivation of coupled SPDE's with a KPZ flavor <i>R. Ahmed, C. Bernardin, P. Gonçalves and M. Simon</i>	890–915
Couplings for Andersen dynamics <i>N. Bou-Rabee and A. Eberle</i>	916–944
Rates of convergence in the central limit theorem for martingales in the non stationary setting <i>J. Dedecker, F. Merlevède and E. Rio</i>	945–966
Random walk in cooling random environment: Recurrence versus transience and mixed fluctuations <i>L. Avena, Y. Chino, C. da Costa and F. den Hollander</i>	967–1009
A shape theorem and a variational formula for the quenched Lyapunov exponent of random walk in a random potential <i>C. Janjigian, S. Nurbavlijev and F. Rassoul-Agha</i>	1010–1040
Transience and recurrence of sets for branching random walk via non-standard stochastic orders <i>T. Hutchcroft</i>	1041–1051
Central limit theorems for parabolic stochastic partial differential equations <i>L. Chen, D. Khoshnevisan, D. Nualart and F. Pu</i>	1052–1077
Renormalisation from non-geometric to geometric rough paths <i>Y. Bruned</i>	1078–1090
The Brownian disk viewed from a boundary point <i>J.-F. Le Gall</i>	1091–1119
The density of the (α, d, β)-superprocess and singular solutions to a fractional non-linear PDE <i>T. Hughes</i>	1120–1159
Intrinsic area near the origin for self-similar growth-fragmentations and related random surfaces <i>E.G. Ged</i>	1160–1181
On the explosion of the number of fragments in simple exchangeable fragmentation-coagulation processes <i>C. Foucart and X. Zbou</i>	1182–1207
Weak convergence of the intersection point process of Poisson hyperplanes <i>A. Baci, G. Bonnet and C. Thäle</i>	1208–1227
Two-dimensional Lorentz process for magnetotransport: Boltzmann-Grad limit <i>A. Nota, C. Saffirio and S. Simonella</i>	1228–1243
Asymptotic expansion of correlation functions for \mathbb{Z}^d covers of hyperbolic flows <i>D. Dolgopyat, P. Nándori and F. Pène</i>	1244–1283
Iterated invariance principle for slowly mixing dynamical systems <i>M. Galton and I. Melbourne</i>	1284–1304
