

ANNALES DE L'INSTITUT HENRI POINCARÉ

PROBABILITÉS ET STATISTIQUES

On mean estimation for heteroscedastic random variables <i>L. Devroye, S. Lattanzi, G. Lugosi and N. Zivotovskiy</i>	1–20
Trees, forests, and impurity-based variable importance in regression <i>E. Scornet</i>	21–52
Risk bounds when learning infinitely many response functions by ordinary linear regression <i>V. Plassier, F. Portier and J. Segers</i>	53–78
Semiparametric estimation of McKean–Vlasov SDEs <i>D. Belomestny, V. Pilipauskaitė and M. Podolskij</i>	79–96
Extreme order statistics of random walks <i>J. Pitman and W. Tang</i>	97–116
Busemann process and semi-infinite geodesics in Brownian last-passage percolation <i>T. Seppäläinen and E. Sorensen</i>	117–165
Scaling limit for random walk on the range of random walk in four dimensions <i>D. A. Croydon and D. Shiraisbi</i>	166–184
A functional stable limit theorem for Gibbs–Markov maps <i>D. Kocheim, F. Pübringer and R. Zweimüller</i>	185–207
Diffusivity of a walk on fractures of a hypertorus <i>P. Lammers</i>	208–229
Cutoff for permuted Markov chains <i>A. Ben-Hamou and Y. Peres</i>	230–243
The diameter of the directed configuration model <i>X. S. Cai and G. Perarnau</i>	244–270
A simplified second-order Gaussian Poincaré inequality in discrete setting with applications <i>P. Eichelsbacher, B. Rednoŝ, C. Thäle and G. Zheng</i>	271–302
Diffusive limits of two-parameter ordered Chinese Restaurant Process up-down chains <i>K. Rivera-Lopez and D. Rizzolo</i>	303–324
Dynamical Gibbs–non-Gibbs transitions in Widom–Rowlinson models on trees <i>S. Bergmann, S. Kissel and C. Külske</i>	325–344
Large deviation principle for the intersection measure of Brownian motions on unbounded domains <i>T. Mori</i>	345–363
A characterization of transportation-information inequalities for Markov processes in terms of dimension-free concentration <i>D. Lacker and L. C. Yeung</i>	364–377
Noise effects in some stochastic evolution equations: Global existence and dependence on initial data <i>H. Tang and A. Yang</i>	378–410
Boundary traces of shift-invariant diffusions in half-plane <i>M. Kwaśnicki</i>	411–436
Limit theorems in Wasserstein distance for empirical measures of diffusion processes on Riemannian manifolds <i>F.-Y. Wang and J.-X. Zhu</i>	437–475
Lyapunov exponents of the SHE under general initial data <i>P. Ghosal and Y. Lin</i>	476–502
Operator-valued matrices with free or exchangeable entries <i>M. Banna and G. Cébron</i>	503–537
