

THE ANNALS of APPLIED PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Poisson process approximations for the Ewens sampling formula RICHARD ARRATIA, A. D. BARBOUR AND SIMON TAVARÉ	519
Stein's method and multinomial approximation	WEI-LIEM LOH 536
Light traffic equivalence in single-server queues	SØREN ASMUSSEN 555
The population composition of a multitype branching random walk M. BRAMSON, P. NEY AND J. TAO	575
A limit theory for random skip lists	LUC DEVROYE 597
Optimal spectral structure of reversible stochastic matrices, Monte Carlo methods and the simulation of Markov random fields ARNOLDO FRIGESSI, CHII-RUEY HWANG AND LAURENT YOUNES	610
The resolvent of a degenerate diffusion on the plane, with application to partially observed stochastic control	IOANNIS KARATZAS AND DANIEL L. OCONE 629
Fluctuations in a nonlinear reaction-diffusion model	PETER KOTELENEZ 669
Matching random subsets of the cube with a tight control on one coordinate WANSOO T. RHEE AND MICHEL TALAGRAND	695
On moments of the first ladder height of random walks with small drift JOSEPH T. CHANG	714
On coupling and weak convergence to stationarity	SØREN ASMUSSEN 739
Buying with exact confidence	S. R. DALAL AND C. L. MALLOWS 752

Vol. 2, No. 3—August 1992
