

THE ANNALS of APPLIED PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

On the Markov chain for the move-to-root rule for binary search trees	ROBERT P. DOBROW AND JAMES ALLEN FILL	1
Rates of convergence for the move-to-root Markov chain for binary search trees	ROBERT P. DOBROW AND JAMES ALLEN FILL	20
A probability inequality for the occupation measure of a reversible Markov chain	I. H. DINWOODIE	37
On rates of convergence for common subsequences and first passage time	WAN SOO T. RHEE	44
On positive Harris recurrence of multiclass queueing networks: A unified approach via fluid limit models	J. G. DAI	49
Insensitivity in discrete-time generalized semi-Markov processes allowing multiple events and probabilistic service scheduling	W. HENDERSON, C. E. M. PEARCE, P. G. TAYLOR AND N. M. VAN DIJK	78
State-dependent Beneš buffer model with fast loading and output rates	Y. KOGAN, R. LIPTSER AND M. SHENFELD	97
On the weak convergence of departures from an infinite series of $M/1$ queues	T. MOUNTFORD AND B. PRABHAKAR	121
Minimal positions in a branching random walk	COLIN MCDIARMID	128
Diffusion approximation for an age-structured population	A. BOSE AND I. KAJ	140
Predicting integrals of stochastic processes	MICHAEL L. STEIN	158
An error analysis for the numerical calculation of certain random integrals: Part 1	LOREN D. PITT, RAINA ROBEVA AND DAO YI WANG	171
Limit theorem on option replication cost with transaction costs	SHIGEO KUSUOKA	198
On weak convergence of conditional survival measure of one-dimensional Brownian motion with a drift	TOBIAS POVEL	222
Prediction and non-Gaussian autoregressive stationary sequences	MURRAY ROSENBLATT	239
A Wold-like decomposition of two-dimensional discrete homogeneous random fields	JOSEPH M. FRANCOS, A. ZVI MEIRI AND BOAZ PORAT	248
Tail events of some nonhomogeneous Markov chains	WOJCIECH NIEMIRO AND PIOTR POKAROWSKI	261
How many iid samples does it take to see all the balls in a box?	THOMAS M. SELKE	294
A stochastic game of optimal stopping and order selection	ALEXANDER V. GNEDIN AND ULRICH KRENGEL	310
A triangle inequality for covariances of binary FKG random variables	J. VAN DEN BERG AND A. GANDOLFI	322

Correction

Rates of convergence of means for distance-minimizing subadditive Euclidean functions	KENNETH S. ALEXANDER	327
---	----------------------	-----

Vol. 5, No. 1—February 1995
