

THE ANNALS of APPLIED STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Special Section on Statistical Methods for Next-Generation Gene Sequencing Data

Special section: Statistical methods for next-generation gene sequencing data	
	KAREN KAFADAR 429
Simultaneous SNP identification in association studies with missing data	
	ZHEN LI, VIKNESWARAN GOPAL, XIAOBO LI, JOHN M. DAVIS AND GEORGE CASELLA 432
Improving sequence-based genotype calls with linkage disequilibrium and pedigree information	BAIYU ZHOU AND ALICE S. WHITTEMORE 457
Change-point model on nonhomogeneous Poisson processes with application in copy number profiling by next-generation DNA sequencing	
	JEREMY J. SHEN AND NANCY R. ZHANG 476
A Bayesian model averaging approach for observational gene expression studies	
	XI KATHY ZHOU, FEI LIU AND ANDREW J. DANNENBERG 497
Statistical tests for the intersection of independent lists of genes: Sensitivity, FDR, and type I error control	LOKI NATARAJAN, MINYA PU AND KAREN MESSER 521
Modeling dependent gene expression	DONATELLO TELESKA, PETER MÜLLER, GIOVANNI PARMIGIANI AND RALPH S. FREEDMAN 542

Articles

More power via graph-structured tests for differential expression of gene networks	
	LAURENT JACOB, PIERRE NEUVIAL AND SANDRINE DUDDIT 561
Functional factor analysis for periodic remote sensing data	
	CHONG LIU, SURAJIT RAY, GILES HOOKER AND MARK FRIEDL 601
Investigating international new product diffusion speed: A semiparametric approach	BRIAN M. HARTMAN, BANI K. MALICK AND DEBABRATA TALUKDAR 625
Bayesian hierarchical rule modeling for predicting medical conditions	
	TYLER H. MCCORMICK, CYNTHIA RUDIN AND DAVID MADIGAN 652
Estimation and testing for spatially indexed curves with application to ionospheric and magnetic field trends	OLEKSANDR GROMENKO, PIOTR KOKOSZKA, LIE ZHU AND JAN SOJKA 669
Meta-analysis of functional neuroimaging data using Bayesian nonparametric binary regression	YU RYAN YUE, MARTIN A. LINDQUIST AND JI MENG LOH 697
Smoothing proximal gradient method for general structured sparse regression . .	XI CHEN, QIHANG LIN, SEYOUNG KIM, JAIME G. CARBONELL AND ERIC P. XING 719
Bayesian modeling longitudinal dyadic data with nonignorable dropout, with application to a breast cancer study	GUANGYU ZHANG AND YING YUAN 753
Analyzing establishment nonresponse using an interpretable regression tree model with linked administrative data	POLLY PHIPPS AND DANIELL TOTH 772
Sparsity with sign-coherent groups of variables via the cooperative-Lasso	
	JULIEN CHIQUET, YVES GRANDVALET AND CAMILLE CHARBONNIER 795
