

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Properties of the stationary measure of the critical case simple branching process SAMUEL KARLIN AND JAMES MCGREGOR	977
Extensions of a limit theorem of Everett, Ulam and Harris on multitype branching process with countably many types.....SHU-TEH C. MOY	992
Epsilon entropy of stochastic processes EDWARD C. POSNER, EUGENE R. RODEMICH AND HOWARD J. RUMSEY, JR.	1000
On hitting for stable processes.....SIDNEY C. PORT	1021
Equivalent Gaussian measures with a particularly simple Radon-Nikodym derivative DALE E. VARBERG	1027
On convergence of the Kiefer-Wolfowitz approximation procedure...J. H. VENTER	1031
A large sample test for the independence of two renewal processes SIDNEY C. PORT AND CHARLES J. STONE	1037
Simple random walk and rank order statistics.....MEYER DWASS	1042
Bounded expected utility.....PETER C. FISHBURN	1054
Statistical models and invariance.....D. A. S. FRASER	1061
The conditional level of Student's t test.....L. BROWN	1068
On selecting a subset of k populations containing the best.....W. J. STUDDEN	1072
Some fixed-sample ranking and selection problems.....D. M. MAHAMUNULU	1079
On canonical forms, non-negative covariance matrices and best and simple least squares linear estimator in linear models.....GEORGE ZYSKIND	1092
The construction of saturated 2_R^{k-p} designs NORMAN R. DRAPER AND TOBY J. MITCHELL	1110
Application of cyclic collineations to the construction of balanced L -restrictional prime powered lattice designs.....B. L. RAKTOE	1127
Replicated (or interpenetrating) samples of unequal sizes.....J. C. KOOP	1142
On the distribution of the largest latent root of the covariance matrix T. SUGIYAMA	1148
Distribution of the largest latent root and the smallest latent root of the generalized B statistic and F statistics and in multivariate analysis.....T. SUGIYAMA	1152
On the exact distributions of likelihood ratio criteria for testing independence of sets of variates under the null hypothesis.....P. C. CONSUL	1160
On the exact distributions of the criterion W for testing sphericity in a p -variate normal distribution.....P. C. CONSUL	1170

(Continued on back cover)

Vol. 38, No. 4—August 1967
