

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
On the jackknife statistic, its extensions, and its relation to e_n -transformations H. L. GRAY, T. A. WATKINS AND J. E. ADAMS	1
Weak convergence of U -statistics and von Mises' differentiable statistical functions R. G. MILLER AND PRANAB KUMAR SEN	31
Linearized rank estimates and signed-rank estimates for the general linear hypothesis CHARLES H. KRAFT AND CONSTANCE VAN EEDEN	42
The calculations of distributions of two-sided Kolmogorov-Smirnov type statistics MARC NOÉ	58
A composite nonparametric test for a scale slippage alternative.	MELVIN N. WOINSKY 65
Existence and consistency of modified minimum contrast estimates.	D. LANDERS 74
Joint asymptotic distribution of the estimated regression function at a finite number of distinct points.	EUGENE F. SCHUSTER 84
The asymptotic inadmissibility of the sample distribution function.	R. R. READ 89
Some admissible empirical Bayes procedures.	GLEN MEEDEN 96
Equivariant procedures in the compound decision problem with finite state component problem.	JAMES HANNAN AND J. S. HUANG 102
Maximum likelihood estimation of a translation parameter of a truncated distribution MICHAEL WOODROOFE	113
Large sample tests for the equality of two covariance matrices.	M. W. J. LAYARD 123
Estimating the size of a multinomial population.	LALITHA SANATHANAN 142
Parameter estimation for an R -dimensional plane wave observed with additive in- dependent Gaussian errors.	MELVIN J. HINICH AND PAUL SHAMAN 153
On the best obtainable asymptotic rates of convergence in estimation of a density function at a point.	R. H. FARRELL 170
An elementary theorem on the probability of large deviations TIMOTHY J. KILLEEN, THOMAS P. HETTMANSPERGER AND GERALD L. SIEVERS	181
Consistency and asymptotic normality of MLE's for exponential models ROBERT H. BERK	193
Characterizations of the multivariate normal distribution using regression properties F. S. GORDON AND A. M. MATHAI	205
Some probability inequalities related to the law of large numbers.	R. J. TOMKINS 230
The division of a sequence of random variables to form two approximately equal sums AIDAN SUDBURY AND PETER CLIFFORD	236
