## STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£7.10s. (U. S. A. \$24.00)
<i>Single Number</i>	£2.5s. (U. S. A. \$4.00)
<i>Loose Leaf Binders for</i>	16s.3d including postage and
<i>Single Abstract Sheets</i>	packing.

### JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 62

March 1967

Number 317

Presidential Address.....	Frederick F. Stephan
Missing Observations in Multivariate Statistics II. Point Estimation in Simple Linear Regression.....	Robert M. Elashoff and A. Afifi
A Multivariate Exponential Distribution.....	Ingram Olkin and Albert W. Marshall
Life-Testing Results Based on a Few Heterogeneous Lognormal Observations.....	John E. Walsh and A. J. McCulloch
Bayesian Approach to Life Testing and Reliability Estimation.....	S. K. Bhattacharya
Optimal Sample Design with Nonresponse.....	William Ericson
A Note on Fellegi's Method of Sampling without Replacement with Probability Proportional to Size.....	Kenneth R. W. Brewer
Step-Wise Clustering Procedures.....	Benjamin King
Inclusion and Exclusion.....	Lajos Takacs
An Algorithm for Obtaining the Zero of a Function of the Dispersion Matrix in Multivariate Analysis.....	Irene M. Trawinski
The Robustness of Hotelling's $T^2$ .....	Olive Jean Dunn and Lois Nelson Holloway
Seasonal Adjustment of Data for Econometric Analysis.....	Dale W. Jorgenson
The Unbiasedness of Zellner's Seemingly Unrelated Regression Equation Estimators.....	N. C. Kakwani
Regional Disparities in Household Consumption in India.....	N. Bhattacharya and B. Mahalanobis
Measures of Concentration.....	Marshall Hall and Nicolaus Tideman
Some Further Notes on Disturbance Estimates in Regression Analysis.....	J. Koerts
Wilcoxon Confidence Intervals for Location Parameters in the Discrete Case.....	Gottfried E. Noether
A Partial Coefficient for Goodman and Kruskal's Gamma.....	James A. Davis
Ties in Paired-Comparison Experiments: A Generalization of the Bradley-Terry Model.....	P. V. Rao and Lawrence L. Kupper
Sequences Balanced for Pairs of Residual Effects.....	C. R. Nair
Equal and Proportional Frequency Squares.....	Sidney Adelman
The Combination of Estimates from Similar Experiments Allowing for Inter-Experiment Variation.....	Pamela M. Morse and A. Bickle
A Note on Regression in the Multivariate Poisson Distribution.....	D. M. Mahamunulu
Distribution of some Statistics in Samples from Exponential and Power-Functions Populations.....	Jiri Likes
Estimation of the Probability of Zero Failures in $m$ Binomial Trials.....	Herbert C. Rutemiller
The Moments of a Doubly Non-Central $t$ -Distribution.....	Marakatha Krishnan
Note on a Uniqueness Relation in Certain Accident Proneness Models.....	N. L. Johnson
Book Reviews.....
