

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- A stochastic representation for mean curvature type geometric flows
H. METE SONER AND NIZAR TOUZI 1145
- On Poisson equation and diffusion approximation 2
È. PARDOUX AND A. YU. VERETENNIKOV 1166
- On drift and entropy growth for random walks on groups ANNA ERSCHLER 1193
- Determinate multidimensional measures, the extended
Carleman theorem and quasi-analytic weights MARCEL DE JEU 1205
- Donsker's theorem for self-normalized partial sums processes
MIKLÓS CSÓRGÓ, BARBARA SZYSZKOWICZ AND QIYING WANG 1228
- The lowest crossing in two-dimensional critical percolation
J. VAN DEN BERG AND A. A. JÁRAI 1241
- Small-time Gaussian behavior of symmetric diffusion semigroups
MASANORI HINO AND JOSÉ A. RAMÍREZ 1254
- Extension du théorème de Cameron–Martin
aux translations aléatoires XAVIER FERNIQUE 1296
- Brownian motion and Dirichlet problems at infinity ELTON P. HSU 1305
- Integrated Brownian motions and exact L_2 -small balls
F. GAO, J. HANNIG AND F. TORCASO 1320
- On the sharp Markov property for Gaussian random fields
and spectral synthesis in spaces of Bessel potentials
LOREN D. PITT AND RAINA S. ROBEVA 1338
- On transition semigroups of (A, Ψ) -superprocesses
with immigration WILHELM STANNAT 1377
- Regularity and irregularity of $(1 + \beta)$ -stable super-Brownian motion
LEONID MYTNIK AND EDWIN PERKINS 1413
- The point of view of the particle on the law of large numbers
for random walks in a mixing random environment FIRAS RASSOUL-AGHA 1441
- On the sample paths of Brownian motions on compact infinite dimensional groups
ALEXANDER BENDIKOV AND LAURENT SALOFF-COSTE 1464
- Scaling limit of stochastic dynamics in classical continuous systems
MARTIN GROTHAUS, YURI G. KONDRATIEV,
EUGENE LYTVYNOV AND MICHAEL RÖCKNER 1494
- Random point fields associated with certain Fredholm determinants II:
Fermion shifts and their ergodic and Gibbs properties
TOMOYUKI SHIRAI AND YOICHIRO TAKAHASHI 1533
- Vapnik–Chervonenkis type conditions and
uniform Donsker classes of functions MICHEL TALAGRAND 1565
- Concentration inequalities using the entropy method
STÉPHANE BOUCHERON, GÁBOR LUGOSI AND PASCAL MASSART 1583
- Attracting edge property for a class of reinforced random walks VLADA LIMIC 1615
- The depth first processes of Galton–Watson trees converge
to the same Brownian excursion
JEAN-FRANÇOIS MARCKERT AND ABDELKADER MOKKADEM 1655
- Comparisons for measure valued processes with interactions
SAUL JACKA AND ROGER TRIBE 1679
