

Selected Proceedings of the Sheffield Symposium on Applied Probability

edited by
I. V. Basawa & R. L. Taylor

Proceedings of the Symposium on Applied Probability, Sheffield, August 1989. The purpose of the Sheffield Symposium on Applied Probability was to focus attention on some of the prominent directions in applied probability. This volume contains several major papers covering models in epidemiology, genetics, random fields, branching processes, random walks, directed polymers and evolution time-scales. The reader will find a broad array of interesting problems discussed in the eighteen technical articles included in this volume.

Contents

Some aspects of the Sheffield Symposium *by I. V. Basawa & R. L. Taylor*; Some remarks on recent developments in applied probability *by J. Gani*; The promotion and development of applied probability: A note on the contributions of Joe Gani *by C. C. Heyde*; Applications of random walks on finite graphs *by D. Aldous*; Analysis of infectious disease data from a sample of households *by N. G. Becker*; On directed polymers in a random environment *by E. Bolthausen*; A look at perturbation approximations for epidemics *by H. E. Daniels*; A central limit theorem for evolving random fields *by P. E. Greenwood & M. Ossiander*; The two-locus ancestral graph *by R. C. Griffiths*; When did Joe's great...grandfather live? Or: On the time scale of evolution *by P. Jagers, O. Nerman, & Z. Taib*; Point processes and inference for rainfall fields *by M. J. Phelan*; A construction for processes with history-dependent transition intensities *by P. Whittle*; Accumulation points of a particular normalized random walk *by A. Adler*; Uniform convergence of martingales in the one-dimensional branching random walk *by J. D. Biggins*; An urn model and the coalescent in neutral infinite-alleles genetic processes *by D. Branson*; The genealogy of patterns of ESS's *by C. Cannings & G. T. Vickers*; Extinction probabilities of branching processes in random environments *by D. R. Grey & L. Zhunwei*; Measure-valued processes: Techniques and applications *by K. J. Hochberg*; Saddlepoint approximations in the case of intractable cumulant generating functions *by J. E. Kolassa*; *U*-statistics and double stable integrals *by J. Mijneer*; Gene conversion and the infinite-sites model *by S. A. Sawyer*
