

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

Sample boundedness of stochastic processes under increment conditions	MICHEL TALAGRAND	1
Diffusion in a singular random environment	W. DAVID WICK	50
Continuity of $l^2$ -valued Ornstein-Uhlenbeck processes	I. ISCOE, M. B. MARCUS, D. McDONALD, M. TALAGRAND AND J. ZINN	68
Characterization of almost surely continuous 1-stable random Fourier series and strongly stationary processes	MICHEL TALAGRAND	85
On extremal theory for stationary processes	J. M. P. ALBIN	92
A note on the approximation of the uniform empirical process	PETER MAJOR	129
Loi fonctionnelle du logarithme itéré pour les processus de Markov récurrents	ABDERRAHMEN TOUATI	140
Functional laws of the iterated logarithm for the product-limit estimator of a distribution function under random censorship or truncation	MING GAO GU AND TZE LEUNG LAI	160
Time-average control of martingale problems: Existence of a stationary solution	RICHARD H. STOCKBRIDGE	190
Time-average control of martingale problems: A linear programming formulation	RICHARD H. STOCKBRIDGE	206
Randomization in the two-armed bandit problem	ROBERT C. DALANG	218
A viscosity solution approach to the asymptotic analysis of queueing systems	PAUL DUPUIS, HITOSHI ISHII AND H. METÉ SONER	226
Nearest-neighbor analysis of a family of fractal distributions	COLLEEN D. CUTLER AND DONALD A. DAWSON	256
Conditioned limit theorems of stopped critical branching Bessel processes	TZONG-YOW LEE	272
Limit theorems for age-structured populations	KARL OELSCHLÄGER	290
Random tree-type partitions as a model for acyclic polymerization: Holtmark (3/2-stable) distribution of the supercritical gel	B. PITTEL, W. A. WOYCZYNSKI AND J. A. MANN	319
Markov properties for point processes on the plane	ELY MERZBACH AND DAVID NUALART	342
Positive dependence properties of point processes	ROBERT M. BURTON, JR. AND MARIE M. FRANZOSA	359
An asymptotic expression for the probability of ruin within finite time	THOMAS HÖGLUND	378
An Edgeworth expansion for $U$ -statistics based on samples from finite populations	P. N. KOKIC AND N. C. WEBER	390
On series representations of infinitely divisible random vectors	JAN ROSINSKI	405

## Book Review

Two books on the Malliavin calculus: <i>The Malliavin Calculus</i> by Denis R. Bell and <i>Stochastic Differential Equations and Malliavin Calculus</i> by S. Watanabe	DANIEL L. OCONE	431
--	-----------------	-----

## Correction

Recurrence, transience and bounded harmonic functions for diffusions in the plane	ROSS G. PINSKY	438
---	----------------	-----

---

Vol. 18, No. 1—January 1990
