

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Memorial Articles

Mark Kac 1914-1984

|  |                   |      |
|--|-------------------|------|
| The influence of Mark Kac on probability theory . . . . .  | HARRY KESTEN      | 1103 |
| The contributions of Mark Kac to mathematical physics . . . . .  | COLIN J. THOMPSON | 1129 |
| A life of the immeasurable mind. A review of <i>Enigmas of Chance</i> ,<br><i>An Autobiography</i> by Mark Kac . . . . . | JOEL E. COHEN     | 1139 |
| Publications of Mark Kac . . . . .   |                   | 1149 |

## Articles

|  |   |      |
|--|---|------|
| Isotropic stochastic flows . . . . .   | PETER BAXENDALE AND THEODORE E. HARRIS            | 1155 |
| A spectral criterion for the finiteness or infiniteness of stopped Feynman-Kac<br>functionals of diffusion processes . . . . . | ROSS PINSKY                                       | 1180 |
| Time reversal of diffusions . . . . .  | U. G. HAUSSMANN AND E. PARDOUX                    | 1188 |
| A one-dimensional diffusion process in a Wiener medium . . . . .   | TH. BROX  | 1206 |
| Sur la saucisse de Wiener et les points multiples du mouvement Brownien<br>JEAN-FRANÇOIS LE GALL                               |   | 1219 |
| Tanaka's formula and renormalization for intersections of planar<br>Brownian motion . . . . .                                  | JAY ROSEN   | 1245 |
| Answers to some questions about increments of a Wiener process<br>CHEN GUIJING, KONG FANCHAO AND LIN ZHENGYAN                  |   | 1252 |
| Regenerative representation for one-dimensional Gibbs states . . . . .   | S. P. LALLEY                                      | 1262 |
| A sufficient condition for association of a renewal process<br>ROBERT M. BURTON, JR. AND ED WAYMIRE                            |   | 1272 |
| The simple exclusion process as seen from a tagged particle . . . . .  | PABLO A. FERRARI                                  | 1277 |
| Central limit theorem for the contact process . . . . .  | ROBERTO HENRIQUE SCHONMANN                        | 1291 |
| Converse results for existence of moments and uniform integrability<br>for stopped random walks . . . . .                      | ALLAN GUT AND SVANTE JANSON                       | 1296 |
| The spectral radius of large random matrices . . . . .   | STUART GEMAN                                      | 1318 |
| Empirical processes indexed by Lipschitz functions . . . . .   | EVARIST GINÉ AND JOEL ZINN                        | 1329 |
| On the rate at which the sample extremes become independent . . . . .  | M. FALK AND W. KOHNE                              | 1339 |
| Limit theorems for a triangular scheme of $U$ -statistics with applications<br>to inter-point distances . . . . .              | S. RAO JAMMALAMADAKA AND SVANTE JANSON            | 1347 |
| Central limit theorems for mixing sequences of random variables under minimal<br>conditions . . . . .                          | HEROLD DEHLING, MANFRED DENKER AND WALTER PHILIPP | 1359 |
| Asymptotic normality for a general statistic from a stationary sequence<br>EDWARD CARLSTEIN                                    |   | 1371 |
| A characterization of the spatial Poisson process and changing time<br>ELY MERZBACH AND DAVID NUALART                          |   | 1380 |
| Compound Poisson approximations for sums of random variables . . . . .   | RICHARD F. SERFOZO                                | 1391 |
| On a lower bound for the multivariate normal Mills' ratio . . . . .  | SATISH IYENGAR                                    | 1399 |
| Stochastic determination of moduli of annular regions and tori . . . . .   | HIROSHI YANAGIHARA                                | 1404 |
| Recurrence of random walks on completely simple semigroups . . . . .   | P. B. CERRITO                                     | 1411 |
| A finite form of de Finetti's theorem for stationary Markov exchangeability . . . . .  | ARIF ZAMAN  | 1418 |

## Book Review

|  |           |      |
|--|-----------|------|
| Two books on large deviations: <i>Entropy, Large Deviations, and Statistical Mechanics</i><br>by Richard S. Ellis and <i>An Introduction to the Theory of Large Deviations</i><br>by D. W. Stroock . . . . . | PETER NEY | 1428 |
|--|-----------|------|
