IMS LECTURE NOTES — MONOGRAPH SERIES

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Shanti S. Gupta, Purdue University.

4 ZONAL POLYNOMIALS
by Akimichi Takemura, Purdue University
A self-contained development of zonal polynomials in the framework of standard multivariate analysis.

Zonal polynomials have been used extensively
in the study of noncentral multivariate distributions.   110 pages
This easily understood treatment uses   List price $15
only the standard tools of linear algebra   IMS members $9
and multivariate normal distribution theory.

5 INEQUALITIES IN STATISTICS AND PROBABILITY
edited by Y.L. Tong, University of Nebraska
Proceedings of the Symposium on Inequalities in Statistics and Probability held in Lincoln, Nebraska during October 1982.

This volume reports on the recent rapid growth
in the field of inequalities due, in part,
to widespread applications in reliability theory,   263 pages
in multivariate nonnormal analysis,   List price $25
and in optimization and constraint problems.   IMS members $15
The volume contains thirty expository
and research papers by leaders in the field.

6 THE LIKELIHOOD PRINCIPLE
by James Berger and Robert Wolpert
A comprehensive presentation and criticism of the likelihood principle and its generalizations.

This book provides a non-technical development
of the likelihood principle with attention
to some of its surprising implications   217 pages
for such areas as randomization analysis,   List price $25
censoring, significance testing,   IMS members $15
and sequential analysis. The authors also discuss
generalizations and implementations
of the likelihood principle.

& ADDITIONAL TITLES
Previously published: Volume 1, *Essays on the Prediction Process* by Frank Knight ($15/members $9); Volume 2, *Survival Analysis* edited by John Crowley and Richard A. Johnson ($25/members $15); Volume 3, *Empirical Processes* by Peter Gaenssler ($20/members $12). Forthcoming: *Group Theory in Statistics* by P. Diaconis, *Approximate Computations of Expectations* by C. Stein, and *Foundations of Exponential Families* by L. Brown.

Prepaid orders for individual volumes and requests for standing order enrollment (eligible for 20% prepublication discounts from list prices) should be sent to
