

Articles

- Construction of improved estimators in multiparameter estimation for discrete exponential families M. GHOSH, J. T. HWANG AND K. W. TSUI
- Discussions by James O. Berger, H. Malcom Hudson, and Carl Morris
Graph-theoretic measures of multivariate association and prediction
JEROME H. FRIEDMAN AND LAWRENCE C. RAFSKY
- Distribution of eigenvalues in multivariate statistical analysis
STEEN A. ANDERSSON, HANS K. BRØNS AND SØREN TOLVER JENSEN
- A universal prior for integers and estimation by minimum description length
JORMA RISSANEN
- Information and asymptotic efficiency in parametric-nonparametric models
JANET M. BEGUN, W. J. HALL, WEI-MIN HUANG, AND JON A. WELLNER
- Smoothing counting process intensities by means of kernel functions
HENRIK RAMLAU-HANSEN
- The min-max algorithm and isotonic regression CHU-IN CHARLES LEE
- Fixed accuracy estimation of an autoregressive parameter T. L. LAI AND D. SIEGMUND
- Efficiency of the conditional score in a mixture setting BRUCE G. LINDSAY
- On moderate deviation theory in estimation WILBERT C. M. KALLENBERG
- Nonparametric estimation of the slope of a truncated regression
P. K. BHATTACHARYA, HERMAN CHERNOFF AND S. S. YANG
- Natural exponential families with quadratic variance functions: statistical theory
CARL N. MORRIS
- Asymptotics for M -type smoothing splines DENNIS D. COX
- A minimax approach to sample surveys CHING-SHUI CHENG AND KER-CHAU LI
- Optimal stopping in the stock market when the future is discounted MARK FINSTER
- Inverting an Edgeworth expansion PETER HALL
- Expansions for the distribution and quantiles of a regular functional of the empirical distribution with applications to nonparametric confidence intervals C. S. WITHERS
- Galton's test as a linear rank test with estimated scores and its local asymptotic efficiency
KONRAD BEHNEN AND GEORG NEUHAUS
- Sheffer polynomials for computing Takác's goodness-of-fit distributions
HEINRICH NIEDERHAUSEN
- An Edgeworth expansion for simple linear rank statistics under the null-hypothesis
RONALD J. M. M. DOES
- Edgeworth expansions for the power of permutation tests R. D. JOHN AND J. ROBINSON
- Robustness of Ferguson's Bayes estimator of a distribution function
ROBERT HANNUM AND MYLES HOLLANDER
- A sharp necessary condition for admissibility of sequential tests-necessary and sufficient conditions for admissibility of SPRT's
L. D. BROWN, A. COHEN AND E. SAMUEL-CAHN
- Multivariate tests with incomplete data MORRIS EATON AND TAKEAKI KARIYA
- Simultaneous interval estimation in the general multivariate analysis of variance model
PETER M. HOOPER
- On the asymptotic relation between L -estimators and M -estimators and their asymptotic efficiency relative to the Cramér-Rao lower bound CONSTANCE VAN EEDEN

Short Communications

- Estimation via linearly combining two given statistics J. K. BAKSALARY AND R. KALA
- Justification for a K - S type test for the slope of a truncated regression
P. K. BHATTACHARYA
- Successive sampling in large finite populations LOUIS GORDON
- A note on discounted future two-armed bandits RICHARD KAKIGI
