

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## The 1979 Wald Memorial Lectures

Infinite systems with locally interacting components . . . . . FRANK SPITZER 349

## Articles

- Subadditive Euclidean functionals and nonlinear growth in geometric probability . . . . . J. MICHAEL STEELE 365  
 When is the cluster of  $S_n/a_n$  empty? . . . . . J. KUELBS 377  
 Rates of convergence in the martingale central limit theorem . . . . . PETER HALL AND C. C. HEYDE 395  
 A law of large numbers for identically distributed martingale differences . . . . . JOHN ELTON 405  
 A method of approximating expectations of functions of sums of independent random variables . . . . . MICHAEL J. KLASS 413  
 Minimal conditions for weak convergence to a diffusion process on the line . . . . . INGE S. HELLAND 429  
 An extended dichotomy theorem for sequences of pairs of Gaussian measures . . . . . G. K. EAGLESON 453  
 A limit theorem for double arrays . . . . . ANDREW ROSALSKY AND HENRY TEICHER 460  
 Comparing the tail of an infinitely divisible distribution with integrals of its Lévy measure . . . . . PAUL EMBRECHTS AND CHARLES M. GOLDIE 468  
 Operator-stable distributions on  $R^2$  with multiple exponents . . . . . WILLIAM N. HUDSON AND J. DAVID MASON 482  
 Necessary and sufficient lifetime conditions for normed convergence of critical age-dependent processes with infinite variance . . . . . MARTIN I. GOLDSTEIN AND FRED M. HOPPE 490

## Short Communications

- The geometric programming dual to the extinction probability problem in simple branching processes . . . . . PAUL D. FEIGIN AND URY PASSAY 498  
 Multiparameter groups of measure-preserving transformations; a simple proof of Wiener's ergodic theorem . . . . . M. E. BECKER 504  
 The mean number of real roots for one class of random polynomials . . . . . M. SHENKER 510  
 On the law of large numbers . . . . . D. L. HANSON AND RALPH P. RUSSO 513  
 On covering single points by randomly ordered intervals . . . . . HENRY BERBEE 520  
 Multiple integrals of a homogeneous process with independent increments . . . . . T. F. LIN 529  
 A note on an inequality involving the normal distribution . . . . . HERMAN CHERNOFF 533
