

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

- Large deviations of sums of independent random variables S. V. NAGAEV 745

Articles

- Approximations of the empirical process when parameters are estimated
M. D. BURKE, M. CSÖRGÖ, S. CSÖRGÖ AND P. RÉVÉSZ 790
- Persistently optimal plans for nonstationary dynamic programming: the
topology of weak convergence case ROBERT P. KERTZ AND DAVID C. NACHMAN 811
- Allocations of probability GLENN SHAFER 827
- Algorithms for linear interpolator and interpolation error for minimal sta-
tionary stochastic processes H. SALEHI 840
- The tail σ -field of time-homogeneous one-dimensional diffusion processes
Uwe RÖSLER 847

Short Communications

- A sharp inequality for martingale transforms D. L. BURKHOLDER 858
- The Brownian escape process R. K. GETTOOR 864
- On the tail behaviour of record-time distributions in a random record
process MARK WESTCOTT 868
- Large deviations of functions of Markovian transitions and mathematical
programming duality GEUNG-HO KIM AND H. T. DAVID 874
- Estimation of a convex real parameter of an unknown information source
JOHN C. KIEFFER 882
- On linearity of s -predictors DIETER LANDERS AND LOTHAR ROGGE- 887
- Discrete analogues of self-decomposability and stability
F. W. STEUTEL AND K. VAN HARN 893
- Multiple coverage of the line JOSEPH GLAZ AND JOSEPH NAUS 900
- Note on a square function inequality A. O. PITTENGER 907

Correction Note

- Corrections to "Central limit theorems for empirical measures" R. M. DUDLEY 909

Vol. 7, No. 5—October 1979
