

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Additive set-valued Markov processes and graphical methods	T. E. HARRIS	355
Limit theorems for nonergodic set-valued Markov processes	DAVID GRIFFEATH	379
On conjectures in first passage percolation theory	JOHN C. WIERMAN AND WOLFGANG REH	388
On hitting probabilities for an annihilating particle model	DIANE SCHWARTZ	398
Geometric ergodicity and R-positivity for general Markov chains	E. NUMMELIN AND R. L. TWEEDIE	404
Maxima of partial samples in Gaussian sequences	YASHASWINI MITTAL	421
A signed measure on path space related to Wiener measure	KENNETH J. HOCHBERG	433
Continuous parameter Markov processes	W. WINKLER	459
Marcinkiewicz laws and convergence rates in the law of large numbers for random variables with multidimensional indices	ALLAN GUT	469
Some Tauberian theorems related to coin tossing	PERSI DIACONIS AND CHARLES STEIN	483
On the many-armed bandit problem	LEIBA RODMAN	491
On the fields of some Brownian martingales	DAVID A. LANE	499

Short Communications

The uniform dimension of the level sets of a Brownian sheet	ROBERT J. ADLER	509
Asymptotic behaviour of the variance of renewal processes and random walks	D. J. DALEY AND N. R. MOHAN	516

Vol. 6, No. 3—June 1978
