

# THE ANNALS of PROBABILITY

*AN OFFICIAL JOURNAL OF*  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

|   |                    |     |
|---|--------------------|-----|
| The strong limits of random matrix spectra for sample matrices of independent elements .....    | KENNETH W. WACHTER | 1   |
| On the gap between deterministic and stochastic ordinary differential equations .....           | HÉCTOR J. SUSSMAN  | 19  |
| Processes that can be embedded in Brownian motion .....   | ITREL MONROE       | 42  |
| Lévy random measures .....  | ALAN F. KARR       | 57  |
| Local nondeterminism and the zeros of Gaussian processes .....                                  | JACK CUZICK        | 72  |
| Insensitivity of steady-state distributions of generalized semi-Markov processes. Part II ..... | R. SCHASSBERGER    | 85  |
| Discrete-time stable processes and their certain properties .....                               | YUZO HOSOYA        | 94  |
| Probability bounds for first exits through moving boundaries .....                              | STEPHEN PORTNOY    | 106 |
| Empirical discrepancies and subadditive processes .....   | J. MICHAEL STEELE  | 118 |

## Short Communications

|   |   |     |
|---|---|-----|
| A generalization of Markov processes .....  | ABEL KLEIN                                | 128 |
| A proof of Kakutani's conjecture on random subdivision of longest intervals .....                                     | W. R. VAN ZWET                            | 133 |
| The distortion-rate function for nonergodic sources<br>P. C. SHIELDS, D. L. NEUHOFF, L. D. DAVISSON AND F. LEDRAPPIER | 138                                       |     |
| An extended martingale invariance principle .....   | D. L. MCLEISH                             | 144 |
| On the increments of multidimensional random fields .....   | DONALD GEMAN AND JOEL ZINN                | 151 |
| Conditions for a class of stationary Gaussian processes to be Kolmogorov mixing .....                                 | HARRY DYM                                 | 159 |
| On the law of the iterated logarithm .....  | R. J. TOMKINS                             | 162 |
| A curious converse of Siever's theorem .....  | JAMES LYNCH                               | 169 |
| Converting dependent models into independent ones, preserving essential features .....                                | N. LANGBERG, F. PROSCHAN AND A. J. QUINZI | 174 |
