## THE ANNALS of PROBABILITY

## AN OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

## **Articles**

Reflection groups, generalized Schur functions, and the geometry of	
majorization	829
Iterated logarithm laws for asymmetric random variables barely with or	
without finite mean	861
Martingale invariance principles	875
Martingales with a countable filtering index set JP. Gabriel	888
Stochastic inequalities on partially ordered spaces	
T. KAMAE, U. KRENGEL AND G. L. O'BRIEN	899
Large deviation probabilities for samples from a finite population J. Robinson	913
A local limit theorem for the Wilcoxon rank sum	926
The order of the normal approximation for linear combinations of order statistics with smooth weight functions	940
Almost sure approximation of the Robbins-Monro process by sums of in-	940
dependent random variables	954
dependent random variables	304
processes	966
Reconstructing the distribution from partial sums of samples	000
G. Halász and P. Major	987
Short Communications	
(	000
An improved upper bound for standard p-functionsV. M. Joshi	999
An improved upper bound for standard p-functions	999 1004
An improved upper bound for standard $p$ -functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space	1004
An improved upper bound for standard $p$ -functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space Patrick L. Brockett	
An improved upper bound for standard $p$ -functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space	1004
An improved upper bound for standard p-functions	1004 1012
An improved upper bound for standard p-functions	1004 1012
An improved upper bound for standard p-functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space  PATRICK L. BROCKETT A counterexample in the approximation theory of random summation  DIETER LANDERS AND LOTHAR ROGGE The sample function continuity of stochastic integrals in the plane  EUGENE WONG AND MOSHE ZAKAI Some asymptotic results for occupancy problems LARS HOLST	1004 1012 1018 1024 1028
An improved upper bound for standard p-functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space  PATRICK L. BROCKETT A counterexample in the approximation theory of random summation  DIETER LANDERS AND LOTHAR ROGGE The sample function continuity of stochastic integrals in the plane  EUGENE WONG AND MOSHE ZAKAI Some asymptotic results for occupancy problems LARS HOLST Families of sample means converge slowly J. MICHAEL STELLE	1004 1012 1018 1024 1028 1036
An improved upper bound for standard p-functions V. M. Joshi Edgeworth expansions for integrals of smooth functions C. Hipp Supports of infinitely divisible measures on Hilbert space  PATRICK L. BROCKETT A counterexample in the approximation theory of random summation  DIETER LANDERS AND LOTHAR ROGGE The sample function continuity of stochastic integrals in the plane  EUGENE WONG AND MOSHE ZAKAI Some asymptotic results for occupancy problems LARS HOLST	1004 1012 1018 1024 1028
