

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- An optimal stopping problem for sums of dichotomous random variables. H. CHERNOFF AND A. J. PETKAU 875
- Almost sure convergence for the Robbins-Monro process
C. A. GOODSSELL AND D. L. HANSON 890
- Sequential compactness of certain sequences of Gaussian random variables with values in $C[0,1]$ GIAN-CARLO MANGANO 902
- The equivalence of absorbing and reflecting barrier problems for stochastically monotone Markov processes. D. SIEGMUND 914
- Spreading of sets in product spaces and hypercontraction of the Markov operator. RUDOLF AHLWEDE AND PÉTER GÁCS 925
- Random overlapping intervals—a generalization of Erlang's loss formula. DAVID OAKES 940
- Une théorie de la dualité à ensemble Polaire près II
M. A. GARCIA ALVAREZ 947
- Distribution estimates for functionals of the two-parameter Wiener process. VICTOR GOODMAN 977
- Locally finite random sets: Foundations for point process theory. B. D. RIPLEY 983

Short Communications

- The foundations of stochastic geometry. B. D. RIPLEY 995
- On stationarity and superposition of point processes. B. D. RIPLEY 999
- On the unimodality of stable densities. MAREK KANTER 1006
- On the maximal deviation of k -dimensional density estimates
M. ROSENBLATT 1009
- Purely atomic structures supporting undominated and nonuniformly integrable martingales. DAVID A. LANE 1016
- On convexity of measures. YOSEF RINOTT 1020
- Convergence of some expected first passage times. NAOMI B. ROBBINS 1027
- The IFRA closure problem. HENRY W. BLOCK AND T. H. SAVITS 1030
- Noninvariance of d -convergence of k -step Markov approximations
GIDEON SCHWARZ 1033

Vol. 4, No. 6—December 1976
