

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

A predictive view of continuous time processes.....	FRANK B. KNIGHT	573
On a problem of Cox concerning point processes in $R^d$ of "Controlled variability".....	P. GÁCS AND D. SZÁSZ	597
On sequences of "pure heads".....	J. KOMLÓS AND G. TUSNÁDY	608
Semigroups of conditioned shifts and approximation of Markov processes.....	THOMAS G. KURTZ	618
Ergodic theorems for weakly interacting infinite systems and the voter model.....	RICHARD A. HOLLEY AND THOMAS M. LIGGETT	643
Extreme time of stochastic processes with stationary independent increments.....	PRISCILLA GREENWOOD	664
A limit theorem for partially observed Markov chains.....	THOMAS KALJSER	677
Stable densities under change of scale and total variation inequalities.....	MAREK KANTER	697
A functional central limit theorem for stationary random fields.....	CHANDRAKANT M. DEO	708

## Short Communications

On quadratic variation of processes with Gaussian increments.....	RUBEN KLEIN AND EVARIST GINÉ	716
An example in which stationary strategies are not adequate.....	LESTER E. DUBINS AND WILLIAM D. SUDDERTH	722
A general Poisson approximation theorem.....	R. J. SERFLING	726
Entropy zero $\times$ Bernoulli processes are closed in the $\bar{d}$ -metric.....	PAUL SHIELDS AND J.-P. THOUVENOT	732
On derivatives of characteristic functions.....	STEPHEN J. WOLFE	737

## Note

Acknowledgment of priority to "A new formula for $P(R_i \leq b_i, 1 \leq i \leq m, n, F = G^k)$ ".....	G. P. STECK	739
