

# THE ANNALS of PROBABILITY

*AN OFFICIAL JOURNAL OF*  
**THE INSTITUTE OF MATHEMATICAL STATISTICS**

## Articles

Local asymptotic laws for Brownian motion.....	N. C. JAIN AND S. J. TAYLOR	527
Last exit times and additive functionals.....	R. K. GETOOR AND M. J. SHARPE	550
A generalization of Dynkin's identity and some applications KRISHNA B. ATHREYA AND THOMAS G. KURTZ	570	
On the representation of semimartingales.....	HANS FÖLLMER	580
Measure-invariant sets.....	JULIUS BLUM AND P. K. PATHAK	590
The central limit theorem for random motions of $d$ -dimensional Euclidean space.....	LUIS G. GOROSTIZA	603
Radial processes.....	P. W. MILLAR	613
Shock models and wear processes J. D. ESARY, A. W. MARSHALL AND F. PROSCHAN	627	
Record values and maxima.....	SIDNEY I. RESNICK	650
Degeneracy properties of subcritical branching processes J. CHOVER, P. NEY AND S. WAINGER	663	
Epsilon entropy of stochastic processes with continuous paths EDWARD C. POSNER AND EUGENE RODEMICH	674	
On equivalence of probability measures.....	CHARLES R. BAKER	690

## Short Communications

The rate of convergence of a random walk to Brownian motion .....	DAVID F. FRASER	699
A classical limit theorem without invariance or reflection.....	HENRY TEICHER	702
Contributions to the theory of Dirichlet processes RAMESH M. KORWAR AND MYLES HOLLANDER	705	
The probability limit identification function exists under the con- tinuum hypothesis.....	JOSEF ŠTEPÁN	712
A note on the convergence of stable and class L probability measures .....	A. KUMWAR	716
