## Articles

- Busemann functions and the speed of a second class particle in the rarefaction fan  
ERIC CATOR AND LEANDRO P. R. PIMENTEL 2401
- Optimal transport from Lebesgue to Poisson  
MARTIN HUESMANN AND KARL-THEODOR STURM 2426
- Rate of convergence and Edgeworth-type expansion in the entropic central limit theorem  
SERGEY G. BOBKOV, GENNADIY P. CHISTYAKOV AND FRIEDRICH GÖTZE 2479
- Determinantal point processes with  $J$ -Hermitian correlation kernels  
EUGENE LYTVYNOV 2513
- Regularity of laws and ergodicity of hypoelliptic SDEs driven by rough paths  
MARTIN HAIRER AND NATESH S. PILLAI 2544
- Nonintersecting random walks in the neighborhood of a symmetric tacnode  
MARK ADLER, PATRIK L. FERRARI AND PIERRE VAN MOERBEKE 2599
- Extreme gaps between eigenvalues of random matrices  
GÉRARD BEN AROUS AND PAUL BOURGADE 2648
- Random walks at random times: Convergence to iterated Lévy motion, fractional stable motions, and other self-similar processes . . . . PAUL JUNG AND GREG MARKOWSKY 2682
- Poisson approximations on the free Wigner chaos  
IVAN NOURDIN AND GIOVANNI PECCATI 2709
- Random fields and the geometry of Wiener space  
JONATHAN E. TAYLOR AND SREEKAR VADLAMANI 2724
- Large deviations for solutions to stochastic recurrence equations under Kesten's condition  
D. BURACZEWSKI, E. DAMEK, T. MIKOSCH AND J. ZIENKIEWICZ 2755
- Reflecting random walk in fractal domains  
KRZYSZTOF BURDZY AND ZHEN-QING CHEN 2791
- Central limit theorem for a Stratonovich integral with Malliavin calculus  
DANIEL HARNETT AND DAVID NUALART 2820
- Uniqueness and universality of the Brownian map . . . . . JEAN-FRANÇOIS LE GALL 2880
- The Burgers equation with Poisson random forcing . . . . . YURI BAKHTIN 2961
- Inhomogeneous bond percolation on square, triangular and hexagonal lattices  
GEOFFREY R. GRIMMETT AND IOAN MANOLESCU 2990
- Integrability and tail estimates for Gaussian rough differential equations  
THOMAS CASS, CHRISTIAN LITTERER AND TERRY LYONS 3026
