

# THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

- A multivariate Gnedenko law of large numbers . . . . . DANIEL FRESEN 3051
- Covariance estimation for distributions with  $2 + \varepsilon$  moments  
NIKHIL SRIVASTAVA AND ROMAN VERSHYNIN 3081
- Characterization of Talagrand's transport-entropy inequalities in metric spaces  
N. GOZLAN, C. ROBERTO AND P.-M. SAMSON 3112
- The empirical cost of optimal incomplete transportation  
EUSTASIO DEL BARRIO AND CARLOS MATRÁN 3140
- Random walks in dynamic random environments: A transference principle  
FRANK REDIG AND FLORIAN VÖLLERING 3157
- Ergodicity of Poisson products and applications . . . . . TOM MEYEROVITCH 3181
- Optimal transportation under controlled stochastic dynamics  
XIAOLU TAN AND NIZAR TOUZI 3201
- An inequality for the distance between densities of free convolutions . . . . . V. KARGIN 3241
- Universality for bond percolation in two dimensions  
GEOFFREY R. GRIMMETT AND IOAN MANOLESCU 3261
- Distance covariance in metric spaces . . . . . RUSSELL LYONS 3284
- Strong uniqueness for stochastic evolution equations in Hilbert spaces perturbed by  
a bounded measurable drift . . . . . G. DA PRATO, F. FLANDOLI, E. PRIOLA AND  
M. RÖCKNER 3306
- Disorder chaos in the Sherrington–Kirkpatrick model with  
external field . . . . . WEI-KUO CHEN 3345
- Harmonic maps on amenable groups and a diffusive lower bound for random walks  
JAMES R. LEE AND YUVAL PERES 3392
- Mean field conditions for coalescing random walks . . . ROBERTO IMBUZEIRO OLIVEIRA 3420
- Annealed Brownian motion in a heavy tailed Poissonian potential . . . RYOKI FUKUSHIMA 3462
- Is the location of the supremum of a stationary process nearly uniformly distributed?  
GENNADY SAMORODNITSKY AND YI SHEN 3494
- A simple path to asymptotics for the frontier of a branching Brownian motion  
MATTHEW I. ROBERTS 3518
