

# THE ANNALS *of* PROBABILITY

*AN OFFICIAL JOURNAL OF THE*  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

|   |  |
|---|--|
| The obstacle problem for quasilinear stochastic PDEs: Analytical approach<br>LAURENT DENIS, ANIS MATOUSSI AND JING ZHANG  | 865  |
| Matrix concentration inequalities via the method of exchangeable pairs<br>LESTER MACKEY, MICHAEL I. JORDAN, RICHARD Y. CHEN,<br>BRENDAN FARRELL AND JOEL A. TROPP | 906  |
| The Parisi formula for mixed $p$ -spin models . . . . .   | DMITRY PANCHENKO 946   |
| The Seneta–Heyde scaling for the branching random walk<br>ELIE AIDEKON AND ZHAN SHI   | 959  |
| Integration by parts formula and shift Harnack inequality for stochastic equations<br>FENG-YU WANG  | 994  |
| On the existence of paths between points in high level excursion sets of Gaussian<br>random fields . . . . .  | ROBERT J. ADLER, ELINA MOLDAVSKAYA AND<br>GENNADY SAMORODNITSKY 1020 |
| Maximal stream and minimal cutset for first passage percolation through a domain of $\mathbb{R}^d$<br>RAPHAËL CERF AND MARIE THÉRET                               | 1054   |
| Cluster sets for partial sums and partial sum processes . . . . .   | UWE EINMAHL AND<br>JIM KUELBS 1121                                   |
| Random doubly stochastic matrices: The circular law . . . . .   | HOI H. NGUYEN 1161   |
| A simplified proof of the relation between scaling exponents in first-passage percolation<br>ANTONIO AUFFINGER AND MICHAEL DAMRON                                 | 1197   |
| The intermediate disorder regime for directed polymers in dimension $1 + 1$<br>TOM ALBERTS, KONSTANTIN KHANIN AND JEREMY QUASTEL                                  | 1212   |
| Stationary distributions for a class of generalized Fleming–Viot<br>processes . . . . .   | KENJI HANDA 1257   |
| Convergence in distribution for subcritical 2D oriented percolation seen from its rightmost<br>point . . . . .  | E. D. ANDJEL 1285  |
