

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Planar Brownian motion and Gaussian multiplicative chaos	ANTOINE JEGO	1597
Bounding the number of self-avoiding walks: Hammersley–Welsh with polygon insertion HUGO DUMINIL-COPIN, SHIRSHENDU GANGULY, ALAN HAMMOND AND IOAN MANOLESCU		1644
Elliptic stochastic quantization	SERGIO ALBEVERIO, FRANCESCO C. DE VECCHI AND MASSIMILIANO GUBINELLI	1693
Growth-fragmentation processes in Brownian motion indexed by the Brownian tree JEAN-FRANÇOIS LE GALL AND ARMAND RIERA		1742
Points of infinite multiplicity of planar Brownian motion: Measures and local times ELIE AÏDÉKON, YUEYUN HU AND ZHAN SHI		1785
Averaging dynamics driven by fractional Brownian motion MARTIN HAIRER AND XUE-MEI LI		1826
Confluence of geodesics in Liouville quantum gravity for $\gamma \in (0, 2)$ EWAIN GWYNNE AND JASON MILLER		1861
From nonlinear Fokker–Planck equations to solutions of distribution dependent SDE VIOREL BARBU AND MICHAEL RÖCKNER		1902
Periodic Pólya urns, the density method and asymptotics of Young tableaux CYRIL BANDERIER, PHILIPPE MARCHAL AND MICHAEL WALLNER		1921
Finitary isomorphisms of Brownian motions	ZEMER KOSLOFF AND TERRY SOO	1966
Near-critical spanning forests and renormalization STÉPHANE BENOIST, LAURE DUMAZ AND WENDELIN WERNER		1980
Random walks on dynamical random environments with nonuniform mixing ORIANE BLONDEL, MARCELO R. HILÁRIO AND AUGUSTO TEIXEIRA		2014
Algorithmic thresholds for tensor PCA GÉRARD BEN AROUS, REZA GHEISSARI AND AUKOSH JAGANNATH		2052
Finitely dependent processes are finitary	YINON SPINKA	2088
