

# THE ANNALS of PROBABILITY

ISSN (0091-1798)

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

- A sharp deviation inequality for the stochastic traveling salesman problem  
WAN SOO T. RHEE AND MICHEL TALAGRAND 1
- Two moments suffice for Poisson approximations: The Chen-Stein method  
R. ARRATIA, L. GOLDSTEIN AND L. GORDON 9
- Flux and fixation in cyclic particle systems . . . MAURY BRAMSON AND DAVID GRIFFEATH 26
- Large deviations for systems of noninteracting recurrent particles . . . TZONG-YOW LEE 46
- Large deviations for  $l^2$ -valued Ornstein-Uhlenbeck processes  
I. ISCOE AND D. McDONALD 58
- Invariance principle and empirical mean large deviations of the critical  
Ornstein-Uhlenbeck process . . . JEAN-DOMINIQUE DEUSCHEL 74
- The scaling limit of self-avoiding random walk in high dimensions . . . GORDON SLADE 91
- A central limit theorem for two-dimensional random walks in random sceneries  
ERWIN BOLTHAUSEN 108
- Travelling waves in inhomogeneous branching Brownian motions. II  
S. LALLEY AND T. SELLKE 116
- An algebraic construction of a class of one-dependent processes  
JON AARONSON, DAVID GILAT, MICHAEL KEANE AND VINCENT DE VALK 128
- Smoothness of the convex hull of planar Brownian motion  
M. CRANSTON, P. HSU AND P. MARCH 144
- Coupling methods for multidimensional diffusion processes  
MU-FA CHEN AND SHAO-FU LI 151
- Stochastic difference equations and generalized gamma distributions . . FIMA C. KLEBANER 178
- Dimensional properties of one-dimensional Brownian motion . . . ROBERT KAUFMAN 189
- Integration by parts, homogeneous chaos expansions and smooth densities  
ROBERT J. ELLIOTT AND MICHAEL KOHLMANN 194
- Integration by parts and time reversal for diffusion processes  
A. MILLET, D. NUALART AND M. SANZ 208
- Hungarian constructions from the nonasymptotic viewpoint  
J. BRETAGNOLLE AND P. MASSART 239
- An extended version of the Erdős-Rényi strong law of large numbers . . DAVID M. MASON 257
- Strong approximation for multivariate empirical and related processes,  
via KMT constructions . . . PASCAL MASSART 266
- Laws of the iterated logarithm for the empirical characteristic function  
MICHAEL T. LACEY 292
- Rates of convergence for the functional LIL . . . VICTOR GOODMAN AND JAMES KUELBS 301
- A functional central limit theorem for random mappings . . . JENNIE C. HANSEN 317
- Stability results and strong invariance principles for partial sums  
of Banach space valued random variables . . . UWE EINMAHL 333
- A convergence property for conditional expectation . . AUREL CORNEA AND PETER A. LOEB 353
- On the three series theorem in number theory . . . JESÚS DE LA CAL 357
- Weak convergence of smoothed and nonsmoothed bootstrap  
quantile estimates . . . M. FALK AND R.-D. REISS 362
- The lattice property of uniform amarts . . . KLAUS D. SCHMIDT 372
- A note on capacity measures of semipolar sets . . . MAMORU KANDA 379
- A theorem of Feller revisited . . . Z. D. BAI 385
- The total variation distance between the binomial and Poisson distributions  
J. E. KENNEDY AND M. P. QUINE 396

## Correction

- Bad rates of convergence for the central limit theorem in Hilbert space  
WAN SOO RHEE AND MICHEL TALAGRAND 401

Vol. 17, No. 1—January 1989
