

THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Necessary and sufficient conditions for the continuity of local time
of Lévy processes M. T. BARLOW 1389
- Connecting Brownian paths BURGESS DAVIS AND THOMAS S. SALISBURY 1428
- Measuring close approaches on a Brownian path
EDWIN A. PERKINS AND S. JAMES TAYLOR 1458
- Large deviation principles for stationary processes
STEVEN OREY AND STEPHAN PELIKAN 1481
- Large deviations for the empirical measure of a Markov chain with an application
to the multivariate empirical measure RICHARD S. ELLIS 1496
- Large deviations analysis of some recursive algorithms with state dependent noise
PAUL DUPUIS 1509
- Large deviations for noninteracting infinite particle systems TZONG-YOW LEE 1537
- Some limit theorems for voter model occupation times J. T. COX 1559
- The contact process on a finite set. II
RICHARD DURRETT AND ROBERTO H. SCHONMANN 1570
- Necessary conditions for sample boundedness of p -stable processes .. MICHEL TALAGRAND 1584
- Path properties of index- β stable fields JOHN P. NOLAN 1596
- Asymptotic normality of trimmed means in higher dimensions R. A. MALLER 1608
- Strong limit theorems for weighted quantile processes
JOHN H. J. EINMAHL AND DAVID M. MASON 1623
- Bounds on the coarseness of random sums JAMES ALLEN FILL 1644
- Rate of convergence in bootstrap approximations PETER HALL 1665
- On the convergence rate in the central limit theorem for associated processes
THOMAS BIRKEL 1685
- A nonuniform bound on the rate of convergence in the martingale central
limit theorem ERICH HAEUSLER AND KONRAD JOOS 1699
- Lyapunov exponents for matrices with invariant subspaces ERIC S. KEY 1721
- Necessary and sufficient conditions for almost sure convergence of the
largest eigenvalue of a Wigner matrix Z. D. BAI AND Y. Q. YIN 1729
- Random cell complexes and generalised sets M. ZÄHLE 1742
- Growth rates of Euclidean minimal spanning trees with power weighted edges
J. MICHAEL STEELE 1767
- Mixing properties for random walk in random scenery W. TH. F. DEN HOLLANDER 1788
- A multivariate extension of Hoeffding's lemma ... HENRY W. BLOCK AND ZHAOBEN FANG 1803
- An example on highly singular parabolic measure . ROBERT KAUFMAN AND JANG-MEI WU 1821
- On log-concave and log-convex infinitely divisible sequences and densities
BJORN G. HANSEN 1832
- Conditioning a lifted stochastic system in a product space ANDREW CARVERHILL 1840
- On the Wiener-Masani algorithm for finding the generating function of
multivariate stochastic processes A. G. MIAMEE 1854

Vol. 16, No. 4—October 1988
