

ANNALS OF STATISTICS

Vol. 9

November

No. 6

Articles

- Estimation of the mean of a multivariate normal distribution
CHARLES M. STEIN
- Parameter transformations for improved approximate confidence regions
in nonlinear least squares.
DOUGLAS M. BATES AND DONALD G. WATTS
- On the robustness and efficiency of some randomized designs
CHIEN-FU WU
- Tests for independence in two-way contingency tables based on canonical
correlation and on linear-by-linear interaction
SHELBY J. HABERMAN
- On the asymptotic accuracy of Efron's bootstrap KESAR SINGH
- Some asymptotic theory for the bootstrap
PETER J. BICKEL AND DAVID A. FREEDMAN
- Bootstrapping regression models D. A. FREEDMAN
- Asymptotic theory of triple sampling for sequential estimation of a
mean PETER HALL
- Inadmissibility of large classes of sequential tests
L. D. BROWN AND ARTHUR COHEN
- Likelihood ratio tests for and against a stochastic ordering between
multinomial populations TIM ROBERTSON AND F. T. WRIGHT
- Invariant tests on covariance matrices JOHN I. MARDEN
- Robustness of multivariate tests TAKEAKI KARIYA
- Regression analysis with randomly right-censored data
H. KOUL, V. SUSARLA AND J. VAN RYZIN
- A complete class theorem for statistical problems with finite sample
spaces LAWRENCE D. BROWN
- Minimax estimation of the mean of a normal distribution when the
parameter space is restricted P. J. BICKEL
- On the almost everywhere convergence of nonparametric regression
function estimates LUC DEVROYE
- On the asymptotic probability of error in nonparametric discrimi-
nation LUC DEVROYE

Short Communications

- A comparison of the Efron-Hinkley ancillary and the likelihood ratio
ancillary in a particular example BO V. PEDERSEN
- A necessary and sufficient condition for second order admissibility with
applications to Berkson's bioassay problem
J. K. GHOSH AND BIMAL K. SINHA
- On estimating the probability of discovering a new species
ANNE CHAO
