

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Rough semimartingales and p -variation estimates for martingale transforms PETER K. FRIZ AND PAVEL ZORIN-KRANICH	397
Logarithmic heat kernel estimates without curvature restrictions XIN CHEN, XUE-MEI LI AND BO WU	442
Universality of cutoff for exclusion with reservoirs JUSTIN SALEZ	478
Berry–Esseen type bounds for the left random walk on $GL_d(\mathbb{R})$ under polynomial moment conditions . . C. CUNY, J. DEDECKER, F. MERLEVÈDE AND M. PELIGRAD	495
Global-in-time probabilistically strong and Markov solutions to stochastic 3D Navier–Stokes equations: Existence and nonuniqueness. . . MARTINA HOFMANOVÁ, RONGCHAN ZHU AND XIANGCHAN ZHU	524
High-dimensional near-critical percolation and the torus plateau TOM HUTCHCROFT, EMMANUEL MICHTA AND GORDON SLADE	580
Thermodynamic and scaling limits of the non-Gaussian membrane model. . ERIC THOMA	626
Lower tails via relative entropy GADY KOZMA AND WOJCIECH SAMOTIJ	665
Stability of Schrödinger potentials and convergence of Sinkhorn’s algorithm MARCEL NUTZ AND JOHANNES WIESEL	699
Stein’s method for conditional central limit theorem PARTHA S. DEY AND GRIGORY TERLOV	723
More limiting distributions for eigenvalues of Wigner matrices SIMONA DIACONU	774
