

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Universality classes for the coalescent structure of heavy-tailed Galton–Watson trees SIMON HARRIS, SAMUEL G. G. JOHNSTON AND JUAN CARLOS PARDO	387
Mutual information for the sparse stochastic block model TOMAS DOMINGUEZ AND JEAN-CHRISTOPHE MOURRAT	434
A limit law for the most favorite point of simplerandom walk on a regular tree MAREK BISKUP AND OREN LOUIDOR	502
Towards optimal spectral gaps in large genus MICHAEL LIPNOWSKI AND ALEX WRIGHT	545
Singular kinetic equations and applications ZIMO HAO, XICHENG ZHANG, RONGCHAN ZHU AND XIANGCHAN ZHU	576
The Minkowski content measure for the Liouville quantum gravity metric EWAIN GWYNNE AND JINWOO SUNG	658
Cutoff profile of the Metropolis biased card shuffling	LINGFU ZHANG 713
Spectral central limit theorem for additive functionals of isotropic and stationary Gaussian fields	LEONARDO MAINI AND IVAN NOURDIN 737
