

# THE ANNALS OF PROBABILITY

VOLUME 2

AUGUST 1974

No. 4

## Articles

- Strong and weak limit points of a normalized random walk  
BRUCE K. ERICKSON AND HARRY KESTEN
- Random stirring of the real line.....WANG CHUNG LEE
- “Normal” distribution functions on spheres and the modified Bessel  
functions.....PHILIP HARTMAN AND GEOFFREY WATSON
- Functional central limit theorems for random walks conditioned to stay  
positive.....DONALD L. IGLEHART
- Dependent central limit theorems and invariance principles  
D. L. McLEISH
- On the central limit theorem for sample continuous processes  
EVARIST GINÉ M.
- On the weak convergence of empirical processes in sup-norm metrics  
NEVILLE E. O'REILLY
- Postulates for subadditive processes.....J. M. HAMMERSLEY
- Symmetric Markov chains I.....MARTIN L. SILVERSTEIN
- Asymptotic maxima of continuous Gaussian processes... M. B. MARCUS
- On the law of the iterated logarithm.....HENRY TEICHER

## Short Communications

- Series of random processes without discontinuities of the second kind  
OLAV KALLENBERG
- On a characterization of the family of distributions with constant multi-  
variate failure rates.....PREM S. PURI AND HERMAN RUBIN
- On the accuracy of the normal approximation for quantiles.... R.-D. REISS
- Un critere probabiliste de compacite des groupes  
A. BRUNEL AND D. REVUZ

## Notes

- Acknowledgment of priority to “Random variables with independent  
binary digits”.....GEORGE MARSAGLIA
- Addendum to “The Annals of Probability, Contents of Volume 1 1973”
