

THE ANNALS OF PROBABILITY

VOLUME 3

OCTOBER 1975

No. 5

Articles

- On existence and non-existence of proper, regular, conditional distributions.....DAVID BLACKWELL AND LESTER E. DUBINS
SLLNs and CLTs for infinite particle systems
S. C. PORT, C. J. STONE AND N. A. WEISS
- A functional law of the iterated logarithm for weighted empirical distributions.....BARRY R. JAMES
- Limit theorems for extreme values of chain-dependent processes
G. E. DENZEL AND G. L. O'BRIEN
- Limit theorems for a $GI/G/\infty$ queue.....NORMAN KAPLAN
- The first birth problem for an age-dependent branching process
J. F. C. KINGMAN
- On the rate of convergence in the central limit theorem in two dimensions and its application.....M. H. AFGHAHI
- On errors of normal approximation.....R. N. BHATTACHARYA
- A maximal inequality and dependent strong laws.....D. L. MCLEISH
- Coefficient properties of random variable sequences..WILLIAM J. BARLOW
- Conditions for finite moments of the number of zero crossings for Gaussian processes.....JACK CUZICK
- Explicit construction of invariant measures for a class of continuous state Markov processes.....S. HALFIN
- Stable measures and seminorms.....ALEJANDRO DE ACOSTA

Short Communications

- Note on a limit theorem.....D. A. DARLING
- A strong law of large numbers for random compact sets
ZVI ARTSTEIN AND RICHARD A. VITALE
- A conditional local limit theorem for recurrent random walk
W. D. KAIGH
- Weak comparative probability on infinite sets.....PETER C. FISHBURN
- A simpler expression for K th nearest neighbor coincidence probabilities
RAYMOND J. HUNTINGTON AND JOSEPH I. NAUS
- Generalisation and application of some results of Ibragimov on convergence to normality.....JULIAN LESLIE
- A nonuniform bound on convergence to normality.....C. C. HEYDE
