

The Annals of Probability

Vol. 22

January 1994

No. 1

Articles

- Stable limits for associated random variables
ANDRÉ ROBERT DABROWSKI AND ADAM JAKUBOWSKI
- Large deviations, moderate deviations and LIL for empirical processes LIMING WU
- Sharper bounds for Gaussian and empirical processes M. TALAGRAND
- Rates of convergence for empirical processes of stationary mixing sequences BIN YU
- A remark on convergence in distribution of U -statistics EVARIST GINÉ AND JOEL ZINN
- On the average difference between concomitants and order statistics
PREM K. GOEL AND PETER HALL
- The asymptotic distribution of intermediate sums . SÁNDOR CSÓRGÓ AND DAVID M. MASON
- Survival asymptotics for Brownian motion in a Poisson field
of decaying traps ERWIN BOLTHAUSEN AND FRANK DEN HOLLANDER
- Hitting spheres from the exterior C. BETZ AND H. GZYL
- Domination between trees and application to an explosion problem
ROBIN PEMANTLE AND YUVAL PERES
- Stationary processes indexed by a homogeneous tree JEAN-PIERRE ARNAUD
- Markov chains indexed by trees ITAI BENJAMINI AND YUVAL PERES
- Survival of one-dimensional cellular automata under random perturbations
MAURY BRAMSON AND CLAUDIA NEUHAUSER
- Algebraic L^2 decay of attractive critical processes on the lattice
JEAN-DOMINIQUE DEUSCHEL
- Disagreement percolation in the study of Markov fields J. VAN DEN BERG AND C. MAES
- Exponential waiting time for a big gap in a one-dimensional
zero-range process P. A. FERRARI, A. GALVES AND C. LANDIM
- Current fluctuations for the asymmetric simple exclusion process
P. A. FERRARI AND L. R. G. FONTES
- Particle systems and reaction-diffusion equations R. DURRETT AND C. NEUHAUSER
- Spatial patterns when phases separate in an interacting
particle system A. DE MASI, A. PELLEGRINOTTI, E. PRESUTTI AND M. E. VARES
- Asymptotics of exit times for Markov jump processes I. ISCOE AND D. McDONALD
- Dynamics of the McKean-Vlasov equation TERENCE CHAN
- A proof of Steutel's conjecture GUNDORPH K. KRISTIANSEN
- A law of the logarithm for kernel quantile density estimators XIAOJING XIANG
- On a domination of sums of random variables by sums
of conditionally independent ones PAWEŁ HITCZENKO
- Integration by parts on Wiener space and the existence
of occupation densities PETER IMKELLER AND DAVID NUALART
- Itô excursion theory for self-similar Markov processes J. VUOLLE-APIALA
- Decomposition of Dirichlet processes and its application T. J. LYONS AND T. S. ZHANG
- Asymptotic behavior of the two level measure branching process YADONG WU
- A law of the iterated logarithm for stochastic processes defined
by differential equations with a small parameter . M. A. KOURITZIN AND A. J. HEUNIS
