

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Stochastic Discrimination

- A concrete statistical realization of Kleinberg's stochastic discrimination
for pattern recognition. Part I. Two-class classification
DECHANG CHEN, PENG HUANG AND XIUZHEN CHENG 1393

Financial Options

- Financial options and statistical prediction intervals PER ASLAK MYKLAND 1413

Multivariate Analysis

- A scatter matrix estimate based on the zonotope
GLEB A. KOSHEVOY, JYRKI MÖTTÖNEN AND HANNU OJA 1439
Projection-based depth functions and associated medians YIJUN ZUO 1460
Enriched conjugate and reference priors for the Wishart family
on symmetric cones GUIDO CONSONNI AND PIERO VERONESE 1491
Testing homogeneity of multivariate normal mean vectors under an order restriction
when the covariance matrices are common but unknown
SHOICHI SASABUCHI, KOJI TANAKA AND TAKESHI TSUKAMOTO 1517
Singular Wishart and multivariate beta distributions M. S. SRIVASTAVA 1537

Nonparametric Regression

- Ridgelets: Estimating with ridge functions EMMANUEL J. CANDÈS 1561
Local asymptotics for polynomial spline regression JIANHUA Z. HUANG 1600
Dimension reduction for the conditional mean in regressions with categorical predictors
BING LI, R. DENNIS COOK AND FRANCESCA CHIAROMONTE 1636
Optimal designs for estimating individual coefficients
in Fourier regression models HOLGER DETTE AND VIATCHESLAV B. MELAS 1669

Correction

- Spectral analysis for
harmonizable processes KEH-SHIN LII AND MURRAY ROSENBLATT 1693
