

THE ANNALS OF PROBABILITY

VOLUME 3

FEBRUARY 1975

No. 1

Articles

Random walks in a random environment.....FRED SOLOMON
Controlled Markov chains....HARRY KESTEN AND FRANK SPITZER
Functionals of Markov processes and superprocesses.... TALMA LEVIATAN
Critical age-dependent branching processes.....WARREN W. ESTY
Applications of space-time harmonic functions to branching processes
THOMAS H. SAVITS

Equivalence of infinitely divisible distributions

WILLIAM N. HUDSON AND HOWARD G. TUCKER
The comparison method for stochastic processes.....G. L. O'BRIEN
Finitely additive conditional probabilities, conglomerability and disintegrations.....LESTER E. DUBINS
On tail probabilities for martingales.....DAVID A. FREEDMAN
Upper and lower functions for martingales and mixing processes
NARESH C. JAIN, KUMAR JOGDEO AND WILLIAM F. STOUT
I-divergence geometry of probability distributions and minimization problems.....I. CSISZÁR

Short Communications

The expectation and variance of the number of components in random linear graphs.....JOSEPH I. NAUS AND LARRY RABINOWITZ
An estimate of the modulus of the characteristic function of a lattice distribution with application to remainder term estimates in local limit theorems.....MICHAEL BENEDICKS
The extent of discrete distributions.....R. M. MEYER
The Hausdorff dimensions of the graph and range of N -parameter Brownian motion in d -space.....LANE YODER
Extremal processes generated by independent nonidentically distributed random variables.....ISHAY WEISSMAN
On location and scale functions of a class of limiting processes with application to extreme value theory.....ISHAY WEISSMAN
On the distribution of the number of successes in independent trials
LEON JAY GLESER

Note

Correction to "On distinguishing translates of measures"
MAREK KANTER
