

THE ANNALS OF PROBABILITY

VOLUME 5

October 1977

No. 5

Articles

- Markov systems and their additive functionals.....E. B. DYNKIN
On the uniqueness and nonuniqueness of proximity processes
LAWRENCE GRAY AND DAVID GRIFFEATH
Convergence rates and r -quick versions of the strong law for stationary
mixing sequences.....TZE LEUNG LAI
Convergence rates for the isotrope discrepancy.....WINFRIED STUTE
The law of the iterated logarithm on arbitrary sequences for stationary
Gaussian processes and Brownian motion.....CLIFFORD QUALLS
The exact Hausdorff measure of the zero set of certain stationary Gaussian
processes.....P. LAURIE DAVIES
Quadratic variation of functionals of Brownian motion...ALBERT T. WANG
An extension of stochastic integrals in the plane
EUGENE WONG AND MOSHE ZAKAI
An inequality for sums of independent random variables indexed by finite
dimensional filtering sets and its applications to the convergence of
series.....JEAN-PIERRE GABRIEL
Two applications of a Poisson approximation for dependent events
NORMAN KAPLAN

Short Communications

- Ergodic theorems for the asymmetric simple exclusion process II
THOMAS M. LIGGETT
A note on planar Brownian motion.....J. G. WENDEL
Quelques ensembles exceptionnels en théorie du potentiel
HÉLÈNE AIRAULT
Interpolation of martingales.....DAVID HEATH
On one-dimensional diffusions with time parameter $(-\infty, \infty)$
J. THEODORE COX
A generalization of the Karlin-McGregor theorem on coincidence prob-
abilities and an application to clustering.....F. K. HWANG
Equilibrium measures for semi-Markov processes...DAVID R. McDONALD
A square function inequality.....G. KLINCSEK
On complete convergence of distributions and expected values of order
statistics.....K. AIYAPPAN NAIR
