

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Maximum likelihood estimation in the multiplicative intensity model
via sieves ALAN F. KARR 473
- Local asymptotics for linear rank statistics with estimated score functions
GEORG NEUHAUS 491
- Efficient estimation in the errors in variables model P. J. BICKEL AND Y. RITOV 513
- Monte Carlo evidence on adaptive maximum likelihood estimation
of a regression DAVID A. HSIEH AND CHARLES F. MANSKI 541
- Estimating trajectories YUNSHYONG CHOW 552
- Strong consistency of least-squares estimators in the monotone regression model
with stochastic regressors N. CHRISTOPEIT AND G. TOSSTORFF 568
- A new approach to least-squares estimation, with applications SARA VAN DE GEER 587
- A class of linear regression parameter estimators constructed by nonparametric
estimation
J. A. CRISTÓBAL CRISTÓBAL, P. FARALDO ROCA AND W. GONZÁLEZ MANTEIGA 603
- Estimation of heteroscedasticity in regression analysis
HANS-GEORG MÜLLER AND ULRICH STADTMÜLLER 610
- One-step L -estimators for the linear model A. H. WELSH 626
- High breakdown-point and high efficiency robust estimates
for regression VICTOR J. YOHAI 642
- M -estimation for discrete data: Asymptotic distribution theory and implications
DOUGLAS G. SIMPSON, RAYMOND J. CARROLL AND DAVID RUPPERT 657
- The robustness and sensitivity of the mixed-Dirichlet Bayesian test
for "independence" in contingency tables I. J. GOOD AND J. F. CROOK 670
- The amalgamation and geometry of two-by-two contingency tables
I. J. GOOD AND Y. MITTAL 694
- An optimization problem with applications to optimal design theory . . CHING-SHUI CHENG 712
- Bootstrap of the mean in the infinite variance case K. B. ATHREYA 724
- Proportionality of covariance matrices P. SVANTE ERIKSEN 732
- Average run lengths of an optimal method of detecting a change
in distribution MOSHE POLLAK 749
- U -processes: Rates of convergence DEBORAH NOLAN AND DAVID POLLARD 780
- A complete class theorem for estimating a noncentrality parameter MO SUK CHOW 800
- Unbiasedness of tests for homogeneity . . . ARTHUR COHEN AND HAROLD B. SACKROWITZ 805
- Sequential shrinkage estimation
MALAY GHOSH, DAVID M. NICKERSON AND PRANAB K. SEN 817
- A nonlinear, nontransitive and additive-probability model for decisions
under uncertainty PETER C. FISHBURN AND IRVING H. LAVALLE 830
- de Finetti's coherence and statistical inference EUGENIO REGAZZINI 845
- Identifying the closest symmetric distribution or density function . . EUGENE F. SCHUSTER 865

Short Communications

- Monotone empirical Bayes test for uniform distributions using the
maximum likelihood estimator of a decreasing density J. C. VAN HOUWELINGEN 875
- On a conjecture of Huber concerning the convergence of projection
pursuit regression LEE K. JONES 880

Corrections

- Estimating a distribution function with truncated data M. WOODROOFE 883
- Skewness and asymmetry: measures and orderings H. L. MACGILLIVRAY 884

Vol. 15, No. 2—June 1987
