|                                                                                                                                                                       |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Three-dimensional Quantum Supergravity and Supersymmetry<br>Spin Foam Models<br><i>Etera R. Livine and Robert Oeckl</i> .....                                         | 951  |
| The quantisation of Poisson structures arising in Chern-Simons<br>theory with gauge group $G \ltimes \mathfrak{g}^*$<br><i>C. Meusburger and B. J. Schroers</i> ..... | 1003 |
| The Glueball Superpotential<br><i>Mina Aganagic, Ken Intriligator, Cumrun Vafa, and<br/>Nicholas P. Warner</i> .....                                                  | 1045 |
| Virtual class of zero loci and Mirror Theorems<br><i>Artur Elezi</i> .....                                                                                            | 1103 |
| Large Volume Perspective on Branes at Singularities<br><i>Martijn Wijnholt</i> .....                                                                                  | 1117 |
| Matrix Models and Gravitation Corrections<br><i>Robbert Dijkgraaf, Annamaria Sinkovics, and Mine Temürhan</i> .....                                                   | 1155 |
