

NOTES

The third number of volume 22 (1921) of the TRANSACTIONS OF THIS SOCIETY contains the following papers: *Polynomials and their residue systems (continued)*, by A. J. Kempner; *On certain two-point properties of general families of curves*, by J. Douglas; *Properties of the solutions of certain functional differential equations*, by W. B. Fite; *Note on a class of polynomials of approximation*, by D. Jackson; *On certain numerical invariants of algebraic varieties with application to Abelian varieties*, by S. Lefschetz.

The second number of volume 23 (1922) of the TRANSACTIONS OF THIS SOCIETY contains the following papers: *Differential geometry of the complex plane*, by J. L. Coolidge; *Invariantive characterizations of linear algebras with the associative law not assumed*, by C. C. MacDuffee; *Curves invariant under point-transformations of special type*, by Mary F. Curtis; *Die Zerlegung von Primzahlen in algebraischen Zahlkörpern*, by Andreas Speiser; *The elliptic modular functions associated with the elliptic norm curve E'* , by Roscoe Woods; *Linear equations with two parameters*, by Anna J. Pell; *The theory of functions of one Boolean variable*, by Karl Schmidt.

On account of the reduction of stock due to unusual sales, the previously announced reduced prices on the publications of this Society have been withdrawn. A new schedule of prices will appear in the February issue.

Professor C. Segre, of the board of editors of the ANNALI DI MATEMATICA, PURA ED APPLICATA, has written to Professor Virgil Snyder expressing the thanks of the board for the cash contributions and the new subscriptions received through the cooperation of the American Mathematical Society. These subscriptions will begin with volume 32 of the third series, the first number of which will be issued soon.

At a meeting of the Executive Committee of the Division of Physical Sciences of the National Research Council, in Boston on December 26, 1922, Professor Oswald Veblen was elected Vice-Chairman of the Division for the year 1922-23.

Sir Ernest Rutherford has been elected president of the British Association for the Advancement of Science, in succession to Sir C. S. Sherrington. The Association will meet at Liverpool in the summer of 1923.

At the meeting of scientists held at Leipzig in September, 1922, preliminary steps were taken to found a new society for the advancement of the theoretical engineering sciences, including mechanics and applied mathematics. A committee was formed, with Professor L. Prandtl, of Göttingen, as chairman, to complete the organization, and to propose a suitable name for the society.

The Jablonowski Society has awarded its prize for a memoir on addition theorems (see this BULLETIN, vol. 26, p. 332) to Dr. P. J. Myrberg, of the University of Helsingfors.
