

THE ANNUAL MEETING IN NEW YORK

The thirty-fifth Annual Meeting of the American Mathematical Society was held in New York City, from Wednesday to Monday, December 26–31, 1928, in conjunction with the meetings of the American Association for the Advancement of Science and the Mathematical Association of America. All the sessions of the Society were held at Columbia University: the Gibbs Lecture in the Casa Italiana, the Symposium on Quantum Mechanics in Room 401 of the Physics Laboratories, all other sessions in Barnard College. The meeting opened on Wednesday evening with a session of the Board of Trustees at the Hotel Lincoln (the headquarters of the mathematical organizations). Thursday was devoted to sectional sessions of the Society. The third award of the Bôcher Memorial Prize was announced at a general session on Friday forenoon; this session was followed by the annual business meeting, at which trustees, officers and members of the Council were elected. The first part of Friday afternoon was devoted to a joint session of the Society, the Mathematical Association and Section A of the American Association for the Advancement of Science; this session was followed by the sixth Josiah Willard Gibbs Lecture under the joint auspices of the Society and the A.A.A.S. On Saturday morning the Society held a joint session with Section K of the A.A.A.S. (Social and Economic Sciences); the Mathematical Association also held its sessions on Saturday. Monday was devoted to a Symposium on Quantum Mechanics, held under the joint auspices of the American Mathematical Society and the American Physical Society.

The joint dinner of the mathematical organizations, held on Friday evening in the Men's Faculty Club of Columbia University, was attended by about one hundred ninety persons. Professor Dunham Jackson was toastmaster.

The mathematicians and their guests were invited to the
