

GENERAL INDEX

1945-1954

[Throughout this Index, bold face numerals are used to denote the volume number; light face numerals denote pages.]

I. RESEARCH PAPERS¹

- Abdelhay, J. *On a theorem of representation*, **55**, 408.
- Aczél, J. *On mean values*, **54**, 392.
- Agnew, R. P. *A genesis for Cesàro methods*, **51**, 90.
- *Spans in Lebesgue and uniform spaces of translations of step functions*, **51**, 229.
- *A simple sufficient condition that a method of summability be stronger than convergence*, **52**, 128.
- *Subseries of series which are not absolutely convergent*, **53**, 118.
- Albert, A. A. *Absolute-valued algebraic algebras*, **55**, 763, 1191.
- Alder, H. L. *The nonexistence of certain identities in the theory of partitions and compositions*, **54**, 712.
- Alexander, J. W. *Gratings and homology theory*, **53**, 201.
- Allendoerfer, C. B. *Steiner's formulae on a general S^n+1* , **54**, 128.
- See Index of Addresses.
- Amitsur, A. S. *A generalization of a theorem on linear differential equations*, **54**, 937.
- Ankeny, N. C. *A note on the minimum of a binary form*, **55**, 615.
- Anning, N. H., and Erdős, P. *Integral distances*, **51**, 598.
- Arens, R. *The space L^∞ and convex topological rings*, **52**, 931.
- *Linear topological division algebras*, **53**, 623.
- Artin, E. See Index of Addresses.
- Artin, E., and Whaples, G. *A note on axiomatic characterization of fields*, **52**, 245.
- Atkins, H. P. *On fractional derivatives of univalent functions*, **52**, 1060.
- Ayer, M. C., and Radó, T. *A note on convergence in length*, **54**, 533.
- Baer, R. *Null systems in projective space*, **51**, 903.
- *Polarities in finite projective planes*, **52**, 77.
- *Projectivities with fixed points on every line of the plane*, **52**, 273.
- *Absolute retracts in group theory*, **52**, 501.
- *The role of the center in the theory of direct decompositions*, **54**, 167.
- Baer, R. and Williams, C. *Splitting criteria and extension types*, **55**, 729.
- Bambah, R. P. *Ramanujan's function $\tau(n)$ —A congruence property*, **53**, 764.
- Bambah, R. P., and Chowla, S. *A new congruence property of Ramanujan's function $\tau(n)$* , **53**, 768.
- — *Congruence properties of Ramanujan's function $\tau(n)$* , **53**, 950.
- Bambah, R. P., Chowla, S., and Gupta, H. *A congruence property of Ramanujan's function $\tau(n)$* , **53**, 766.
- Barankin, E. W. *Bounds for the characteristic roots of a matrix*, **51**, 767.
- *Bounds on characteristic values*, **54**, 728.
- Barker, C. B. *Proof that the Mersenne number M_{167} is composite*, **51**, 389.
- Barsotti, I. *A proof of two fundamental theorems on linear transformations in Hilbert space, without use of the axiom of choice*, **53**, 943.
- Bateman, H. See Index of Addresses.
- Bateman, P. T. *Note on the coefficients of the cyclotomic polynomial*, **55**, 1180.
- Bates, G. E. *Decompositions of a loop into characteristic free summands*, **54**, 566.
- Bates, G. E., and Kiokemeister, F. *A note on homomorphic mappings of quasi-*

¹ Beginning with volume 56, 1950, no research papers except Invited Addresses were published in the Bulletin.
